**The Laws of Scientific Change** Hakob Barseghyan, 2015-08-17 This book systematically creates a general descriptive theory of scientific change that explains the mechanics of changes in both scientific theories and the methods of their assessment It was once believed that while scientific theories change through time their change itself is governed by a fixed method of science Nowadays we know that there is no such thing as an unchangeable method of science the criteria employed by scientists in theory evaluation also change through time But if that is so how and why do theories and methods change Are there any general laws that govern this process or is the choice of theories and methods completely arbitrary and random Contrary to the widespread opinion the book argues that scientific change is indeed a law

governed process and that there can be a general descriptive theory of scientific change It does so by first presenting meta theoretical issues divided into chapters on the scope possibility and assessment of theory of scientific change It then builds a theory about the general laws that govern the process of scientific change and goes into detail about the axioms and theorems of the theory     Designing Better Architecture Education Manjari Chakraborty,2015-11-11

Designing Better Architecture Education is an outcome of a research conducted systematically with diligence passion wide and in depth exercise on the obvious and latent aspects of undergraduate architecture education Although specific to India this study probes the diverse global scenario in acknowledgement of the global style of architecture where green preferences surface as compulsion The findings are arranged systematically analyzed impartially and inferred upon logically The final bunch of suggestions aimed at a much desirable architecture education revamp in India is in fact relevant for architecture education as a whole anywhere The author suggests compaction of graduation time intensification of exposures interactions and instructions shift of focus introduction of contemporary specializations restructuring intake revamping academic administration and a significant change of stance in teaching itself including methods philosophy attitude and paraphernalia The book provides valuable information insight and suggestions to rejuvenate the academic approach to the education of architecture and forms a reliable basis for further endeavour in this direction     HSC Exam Questions Cameron Nunn,2008
