Hsc All Sagation 2015 Jess:

Addressing Epistemic Injustice in Mental Health Karen Newbigging, Anthony Salla, Ulla-Karin Schön, Colin King, 2024-03-20 Epistemic injustice was conceptualized by Fricker as a form of social injustice which occurs when people's authority as a knower is ignored, dismissed or marginalized. It is attracting increasing interest in the mental health field because of the asymmetries of power between people using mental health services and mental health professionals. People experiencing mental health distress are particularly vulnerable to epistemic injustice as a consequence of deeply embedded social stigma, negative stereotyping and assumed irrationality. This is amplified by other forms of stereotyping or structural discrimination including racism, misogyny and homophobia. Consequently, individual testimonies may be discounted as both irrational and unreliable. Epistemic injustice also operates systemically, reflecting social and demographic characteristics such as race, gender, sexuality or disability or age.
