Historical Context

In the 1700s, Great Britain began to industrialize, to use machines to do work and produce goods at a pace never seen before. Factories, buildings that housed giant machines and the hundreds of workers to use them replaced the family as the primary economic unit for producing things. During this age, the Industrial Revolution. Great Britain was able to use its mass-manufactured goods to become the most powerful country in the world, and claim vast colonies. Great Britain was quickly followed by other European countries, the United States, and even Japan in the race to industrialize, because with industrialization came national strength. Industrialization also effected the peoples of the countries it occurred in, both in positive and negative ways. Very few would see their lives unchanged, both for better and for worse.

M. Lazarus, S. Cohen, K. Lambert, R. E,2013-03-12 The idea for this book came while I was observing a student teacher and a master teacher I realized that most student teachers while in training do not have the opportunity to think creatively about their lessons I also noticed that teachers new to the fi eld of teaching suffer the same fate they are too busy trying to survive the day and are not sure how to plan and organize their teaching Lesson plans are one of the most important tools for a teacher and more important for the novice teacher I believe that during student teaching or during their undergraduate years if students were equipped with this book their fi rst year teaching will not look so fi rst year Imagine an undergraduate class fi lled with soon to be Social Studies teachers discussing these selected lesson plans improving upon them and making them their own Most fi rst year teachers over teach or under teach and both types still miss the marks on the standardized test These lesson plans will give the new teacher a place to begin *Hollywood or History?* Sarah J.

Kaka,2022-01-01 The rationale for the present text *Hollywood or History An Inquiry Based Strategy for Using Film to Teach About Inequality and Inequity Throughout History* stems from two main things First and foremost is the fact that the reviews

of the first two volumes in the Hollywood or History series have been overwhelmingly positive especially as it pertains to the application of the strategy for practitioners Classroom utility and teacher practice have continued to be the primary objectives in developing the Hollywood or History strategy The second thing is that this most recent volume in the series takes it in a new direction rather than focusing on eras in history it focuses on the themes of inequity and inequality throughout history and how teachers can utilize the Hollywood or History strategy to tackle some of the more complicated content throughout history that many teachers tend to shy away from There is a firm belief that students connection to film along with teachers ability to use film in an effective manner will help alleviate some of the challenges of teaching challenging topics such as inequity and inequality in terms of gender race socioeconomic status and so much more The book provides 30 secondary lesson plans grades 6 12 that address nine different topics centered around inequity and inequality throughout history many of which connect students to the world we are living in today The intended audience for the book are teachers who teach social studies at the 6th 12th grade level both in the United States and other countries An additional audience will be college and university social studies history methods professors in the United States and worldwide
