Journals Impact Factor Ranking:

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrop rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Journals of the Century Tony Stankus, 2019-12-06 This book first published in 2002 gathers some of America s top subject expert librarians to determine the most influential journals in their respective fields 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide Their choices reflect the history of each discipline or profession taking into account rivalries between universities professional societies for profit and not for profit publishers and even nation states and international ideologies in each journal s quest for reputational dominance Each journal was judged using criteria such as longevity of publication foresight in carving out its niche ability to attract none are in the employ of any publisher but each is fully credentialed and well published and many are award winners The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele

Multidimensional Journal Evaluation Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals The most important indicator to determine the influence of a journal is the Impact Factor Since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical This book defines five dimensions which build a framework for a multidimensional method of journal evaluation The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011

Impact of Global University Ranking Systems on Developing Countries Onyancha, Omwoyo Bosire, Tella, Adeyinka, 2023-06-01

The emotive discourses on the subject of university rankings are directly linked to the effect of such rankings on the performance of universities throughout the world. It has been observed that the top ranked universities attract major financial commitments from the industry, the best students, quality researchers, and a wide range of other quality endowments such as equipment, libraries, and laboratories. It is not surprising that the ranking of universities has gained popularity and become a significant factor shaping not only the reputation of universities but also the performance of said institutions around the world, including the developing countries.

Impact of Global University Ranking Systems on Developing Countries presents a collection of perspectives from scholars and other stakeholders on the impact of the global ranking systems on developing countries. The book is an additional resource for discussion and discourse as far as the global university ranking systems are concerned and opens new frontiers for further research. Covering key topics such as assessment, ethics, and academic freedom, this premier reference source is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.

Beyond Power Transitions David C. Kang, Xinru Ma, 2024-10-08. Questions about the likelihood of conflict between the United States and China have dominated international policy discussion for years. But the leading theory of power transitions between a declining hegemon and a rising rival is based exclusively on European examples such as the Peloponnesian War as chronicled by Thucydides, as well as the rise of Germany under Bismarck and the Anglo-German rivalry of the nineteenth and early twentieth centuries. What lessons does East Asian history offer for both the power transitions debate and the future of U.S.-China relations? Examining the rise and fall of East Asian powers over 1,500 years, *Beyond Power Transitions* offers a new perspective on the forces that shape war and peace. Xinru Ma and David C. Kang argue that focusing on the East Asian experience underscores domestic risks and constraints on great powers, not relative rise and decline in international competition. They find that almost every regime transition before the twentieth century was instigated by internal challenges, and even the exceptions deviated markedly from the predictions of power transition theory. Instead, East Asia was stable for a remarkably long time despite massive power differences because of common understandings about countries' relative status. Provocative and incisive, this book challenges prevailing assumptions about the universality of power transition theory and shows why East Asian history has profound implications for international affairs today.

Demystifying Scholarly Metrics Marc W. Vinyard, Jaimie Beth Colvin, 2022-02-25. *Demystifying Scholarly Metrics* gives librarians and faculty the confidence to navigate the maze of scholarly metrics, identify quality journals in which to publish, and measure the impact of scholarly works. Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics. This user-friendly book demystifies them, helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions. It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact. Several controversies exist in the scholarly metrics landscape, including a disagreement between the proponents of altmetrics and traditional bibliometrics. Even more

contentious debates are breaking out over predatory journals and open access publishing Authors Mark Vinyard and Jaimie Beth Colvin who successfully launched a faculty publishing initiative explain which aspects of metrics are truly essential to grasp and they place these numbers in context They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape

Advances in Non-Drug Research and Application: 2011 Edition ,2012-01-09 Advances in Non Drug Research and Application 2011 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Non Drug The editors have built Advances in Non Drug Research and Application 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Non Drug in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Advances in Non Drug Research and Application 2011 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com> **Towards Industry 5.0**

Numan M. Durakbasa,M. Güneş Gençyılmaz,2023-03-01 This book contains selected papers from International Symposium for Production Research 2022 held on October 6-9 2022 Turkey The book reports recent advances in production engineering and operations It explores topics including production research production management operations management industry 4.0 industrial engineering mechanical engineering engineering management and operational research Presenting real life applications case studies and mathematical models this book is of interest to researchers academics and practitioners in the field of production and operation engineering It provides both the results of recent research and practical solutions to real world problems *Handbook of Social Work with Groups* Charles D.
