Jsc 2014 Question Papers For Agriculture:

China's Peasant Agriculture and Rural Society Jan Douwe van der Ploeg, Jingzhong Ye, 2016-05-20 China's agriculture and rural society has undergone rapid changes in recent years. Many poorer farmers and younger people have moved to cities and yet China has an immense challenge to feed a growing and more affluent population. This book provides a bottom up view of China's agriculture showing how the many millions of Chinese peasants make a living. It presents a vivid description of the mechanisms used by rural households to defend and sustain their livelihoods, increase their agricultural production and improve the quality of their lives. The authors examine the newly emerging trajectories of entrepreneurial and capitalist farming and assess whether such alternatives will be able to meet the enormous social, economic and environmental challenges that China faces. The book also explores the paradigm that has underpinned the organisation and development of China's agriculture from ancient times to the present day. This shows the importance of balancing in the Chinese model as compared to the one-sided imposition of continual modernization in the western model. It is argued that such balancing is at the core of the current Sannong policy referring to the three ruralities of food sovereignty, wellbeing for peasant households and an attractive countryside.

Informal Urban Agriculture Michael Hardman, Peter J. Larkham, 2014-10-01 The book explores how unused and under-used urban spaces from grass verges, roundabouts, green spaces have been made more visually interesting and more productive by informal and usually illegal groups known as guerrilla gardeners. The book focuses on groups in the English Midlands but the work is set in a broad international context and reveals how and why they undertake this illegal activity. Guerrilla gardening is usually viewed uncritically and promoted as a worthwhile activity; this study provides a more balanced evaluation and focuses on its contribution in terms of local food production.

Eurasian Business Perspectives Mehmet Huseyin Bilgin, Hakan Danis, Ender Demir, Meltem Ş. Ucal, 2020-02-10 This volume of Eurasian Studies in Business and Economics presents selected theoretical and empirical papers from the 25th Eurasia Business and Economics Society (EBES) Conference held in Berlin, Germany in May 2018. Covering diverse areas of business and management from different geographic regions, the book focuses on current topics such as consumer engagement, consumer loyalty, travel, blogging and Airbnb's marketing communication strategy as well as healthcare project evaluation and Industry 4.0. It also includes related studies that analyze accounting and finance aspects like bank reliability and the bankruptcy risks of equity crowdfunding start-ups.

Resourcing an Agroecological Urbanism Chiara Tornaghi, Michiel Dehaene, 2021-03-07 Foregrounding an innovative and radical perspective on food planning, this book makes the case for an agroecological urbanism in which food is a key component in the reinvention of new and just social arrangements and ecological practices. Building on state-of-the-art and participatory research on farming, urbanism, food policy and advocacy in the field of food system transformation, this book changes the way food planning has been conceptualised to date and invites the reader to fully embrace the transformative potential of an agroecological perspective. Bringing in dialogue from both the

rural and urban the producer and consumer this book challenges conventional approaches that see them as separate spheres whose problems can only be solved by a reconnection Instead it argues for moving away from a food in the city approach towards an urbanism perspective in which the economic and spatial processes that currently drive urbanisation will be unpacked and dissected and new strategies for changing those processes into more equal and just ones are put forward Drawing on the nascent field of urban political agroecology this text brings together i theoretical re conceptualisations of urbanism in relation to food planning and the emergence of new agrarian questions ii critical analysis of experimental methodologies and performing arts for public dialogue reflexivity and food sovereignty research iii experiences of resourceful land management including urban land use and land tenure change and iv theoretical and practical exploration of post capitalist economics that bring consumers and producers together to make the case for an agroecological urbanism Aimed at advanced students and academics in agroecology sustainable food planning urban geography urban planning and critical food studies this book will also be of interest to professionals and activists working with food systems in both the Global North and the Global South The World Factbook ,2016 **The World Factbook 2016-17** Government Publications Office,2016-08-18 The World Factbook provides information on the history people government economy geography communications transportation military and transnational issues for 267 world entities The World Factbook Reference tab includes maps of the major world regions as well as Flags of the World a Physical Map of the World a Political Map of the World a World Oceans map and a Standard Time Zones of the World map This annual edition also covers information about country profiles and country comparisons It would make an excellent and useful resource for world geography research papers and international relations classes that may study the people history and communication patterns of other countries

Equity and Administration P. G. Turner,2016-05-26 Each generation of lawyers in common law systems faces an important question what is the nature of equity as developed in English law and inherited by other common law jurisdictions While some traditional explanations of equity remain useful including the understanding of equity as a system that qualifies the legal rights people ordinarily have under judge made law and under legislation other common explanations are unhelpful or misleading This volume considers a distinct and little noticed view of equity By examining the ways in which courts of equity have addressed a range of practical problems regarding the administration of deliberately created schemes for the management of others affairs modern equity can be seen to have a strongly facilitative character The extent and limits on this characterisation of equity are explored in chapters covering equity s attitude to administration in various public and private settings in common law systems Women's Empowerment and Microcredit Programmes in India Annabel Dulhunty,2023-08-21 Women s Empowerment and Microcredit Programs in India examines the value of microcredit based self help groups SHGs for women in India and provides an alternative model for women s empowerment programming The microcredit sector continues to boom globally with private investors governments and multilateral financial institutions all

investing substantial amounts in self help group programming Nowhere is this more evident than in India where the industry has further been deregulated in recent years Much of the rationale for increased investment in microcredit is based on the idea that it improves women s empowerment But is this true Researchers have fiercely debated the value of microcredit programs for women with some arguing that it is exploitative and others contending that it is empowering This book provides new insights into women s empowerment and microcredit programming elaborating on the themes of power dignity mobility and solidarity It takes a nuanced view of the complexities surrounding self help group programming and women s empowerment and argues that the model of microcredit self help group programming is key to whether it helps or harms women By focusing on the experiences and voices of microcredit self help group members in West Bengal India this book elaborates on the idea of microcredit models existing on a continuum from smart economics to more holistic feminist versions of programming It will be of interest to scholars in development studies anthropology sociology gender studies and public policy and Asian Studies

Soil Degradation and Restoration in Africa Rattan Lal,B. A. Stewart,2019-07-09 Soil degradation is a widespread problem in Africa resulting in decreased agricultural productivity while demand for food continues to increase Degradation is caused by accelerated erosion acidification contamination depletion of soil organic matter and plant nutrients and salinization The major cause of soil degradation in Africa is uncontrolled and excessive grazing in the savanna regions followed by deforestation and the use of inappropriate and extractive farming practices Perpetual neglect of the health of soils in Africa can exacerbate the already serious problems of food and nutritional insecurity and environmental degradation Food and nutritional security of the growing population of Africa can only be achieved if degraded soils are restored and soils of agroecosystems are managed prudently and sustainably Ignoring soils and taking the fragile finite and precious soil resources for granted is the principal cause of poverty hunger and environmental degradation The downward spiral must be reversed through soil restoration measures based on translating science into action This book describes the soils of Africa processes of soil degradation extent and severity of soil degradation and the impacts of degradation processes on food and nutritional security Features Explores the extent and severity of soil degradation in Africa Analyzes the cause effect relationship between anthropogenic activities and soil degradation Reviews processes of soil degradation in Africa including erosion salinization nutrient depletion and decline of soil organic matter Addresses the effect of climate change on soil degradation in Africa Explains how soil degradation causes food and nutritional insecurity Part of the Advances in Soil Sciences series this volume is specifically devoted to the processes and factors that cause soil degradation and the challenges and potential for remediation and restoration of soil health in Africa

Land-Use Change Impacts on Soil Processes Francis Q Brearley,Andrew D Thomas,2015-09-29 This book examines the effects that land use changes notably agricultural intensification logging soil erosion urbanisation and mining have on soil characteristics and processes in tropical and savannah environments It covers a range of geographical regions and

environments as impacts of land use change are often site specific The effects of land use change on various aspects of the soil ecosystem from both a chemical and biological perspective will be examined
