- **THE 2009 BUDGET** will have a significant impact on the way in which the Government will be able to deliver its policies. The Government has announced a number of measures to reduce the deficit, including a reduction in the top rate of income tax, a reduction in the top rate of corporation tax, and a reduction in the top rate of VAT. These measures will be implemented over the next five years, and will be funded by a combination of new taxes and cuts in public spending.

- Abstract** The purpose of this study was to determine the effect of a 12-week, 30-min, 3 times per week, low-impact aerobically and resistance training program on the physical fitness of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were randomly assigned to either an exercise group or a control group. The exercise group performed a 12-week, 30-min, 3 times per week, low-impact aerobically and resistance training program. The control group performed no exercise. The physical fitness of the subjects was measured at baseline and at 12 weeks. The results of the study showed that the exercise group had significantly higher levels of physical fitness than the control group at 12 weeks. The results also showed that the exercise group had significantly higher levels of physical fitness than the control group at baseline. The results of the study suggest that a 12-week, 30-min, 3 times per week, low-impact aerobically and resistance training program can improve the physical fitness of sedentary, middle-aged women.
