Extrusion Harold F. Giles Jr,John R. Wagner Jr.,Eldridge M. Mount III,2013-09-21 The second edition of Extrusion is designed to aid operators engineers and managers in extrusion processing in quickly answering practical day to day questions The first part of the book provides the fundamental principles for operators and engineers of polymeric materials extrusion processing in single and twin screw extruders The next section covers advanced topics including troubleshooting auxiliary equipment and coextrusion for operators engineers and managers The final part provides applications case studies in key areas for engineers such as compounding blown film extrusion blow molding coating foam and reprocessing This practical guide to extrusion brings together both equipment and materials processing aspects It covers basic and advanced topics for reference and training in thermoplastics processing in the extruder Detailed reference data are provided on such important operating conditions as temperatures start up procedures shear rates pressure drops and safety A practical guide to the selection design and optimization of extrusion processes and equipment Designed to improve production efficiency and product quality Focuses on practical fault analysis and troubleshooting techniques      **The Organisation of Tomorrow**

Mark Van Rijmenam,2019-07-19 The Organisation of Tomorrow presents a new model of doing business and explains how big data analytics blockchain and artificial intelligence force us to rethink existing business models and develop organisations that will be ready for human machine interactions It also asks us to consider the impacts of these emerging information technologies on people and society Big data analytics empowers consumers and employees This can result in an open strategy and a better understanding of the changing environment Blockchain enables peer to peer collaboration and trustless interactions governed by cryptography and smart contracts Meanwhile artificial intelligence allows for new and different levels of intensity and involvement among human and artificial actors With that new modes of organising are emerging where technology facilitates collaboration between stakeholders and where human to human interactions are increasingly replaced with human to machine and even machine to machine interactions This book offers dozens of examples of industry leaders such as Walmart Telstra Alibaba Microsoft and T Mobile before presenting the D2 A2 model a new model to help organisations datafy their business distribute their data analyse it for insights and automate processes and customer touchpoints to be ready for the data driven and exponentially changing society that is upon us This book offers governments
