They were enormous – even the babies were as big as elephants. They had slate-coloured skin which was scaled like a lizard's and shimmered where the sun shone upon it. All five were sitting up, balancing themselves upon their broad powerful tails and their huge three-toed hind-feet while they used their small five-fingered front-feet to pull down the branches upon which they browsed. They looked like giant kangaroos, twenty feet in length, except that their skins were like black crocodiles.

One of the parents was having trouble reaching a bunch of foliage which grew upon a considerable-sized tree. It resolved the difficulty by putting its forelegs round the huge trunk and bearing it down as if it had been a sapling. I thought the action showed not only the great development of its muscles but also the limited development of its brain, for the great weight came crashing down on top of it and it uttered a series of shrill yelps which showed that, big as it was, there was a limit to what it could endure.
