A Hands-On Introduction to Data Science Chirag Shah,2020-04-02 This book introduces the field of data science in a practical and accessible manner using a hands on approach that assumes no prior knowledge of the subject The foundational ideas and techniques of data science are provided independently from technology allowing students to easily develop a firm understanding of the subject without a strong technical background as well as being presented with material that will have continual relevance even after tools and technologies change Using popular data science tools such as Python and R the book offers many examples of real life applications with practice ranging from small to big data A suite of online material for both instructors and students provides a strong supplement to the book including datasets chapter slides solutions sample exams and curriculum suggestions This entry level textbook is ideally suited to readers from a range of disciplines wishing to build a practical working knowledge of data science

Energy Performance and Indoor Climate Analysis in Buildings Jarek Kurnitski,Andrea Ferrantelli,Martin Thalfeldt,2019-11-21 HVAC systems load shifting indoor climate and energy and ventilation performance analyses are the key topics when improving energy performance in new and renovated buildings This development has been boosted by the recently established nearly zero energy building requirements that will soon be in use in all EU Member States as well as similar long term zero energy building targets in Japan the US and other countries The research covered in this Special Issue provides evidence of how new technical solutions have worked in practice in new or renovated buildings and also discusses problems and how solutions should be further developed Another focus is on the more detailed calculation methods needed for the correct design and sizing of dedicated systems and for accurate quantification of energy savings Occupant behavior and building operation is also examined in order to avoid common performance gaps between calculated and measured performance These topics demonstrate the challenge of high performance buildings as in the end comfortable buildings with good indoor climate which are easy and cheap to operate and maintain are expected by end customers Ventilation

performance heating and cooling sizing energy predictions and optimization load shifting and field studies are some of the key topics in this Special Issue contributing to the future of high performance buildings with reliable operation

Between Land and Sea Christopher L. Pastore, 2014-10-13 Christopher Pastore traces how Narragansett Bay's ecology shaped the contours of European habitation trade and resource use and how littoral settlers in turn over two centuries transformed a marshy fractal of water and earth into a clearly defined coastline which proved less able to absorb the blows of human initiative and natural variation

Producing Stateness Jan Beek, 2016-11-01 Jan Beek's book explores everyday police work in an African country and analyses how police officers despite prevailing stereotypes about failed states and African police produce stateness Drawing on highly readable ethnographic descriptions the book shows that Ghanaian police practices often involve the exchange of money bribes the use of violence and the influence of politicians However such informal practices allow police officers to deal with the inconsistent necessities and the social context of their work Ultimately Ghanaian police officers are also inspired by a bureaucratic ethos and their practices are guided by it Stateness the book argues is a quality of organizations gradually emerging out of such everyday encounters Producing Stateness allows a close look at the realities of police work in Africa and provides surprising insights into the rationalities of policing and state bureaucracies everywhere

Answers in the Dark Delphi Ellis, 2022-05-27. The 4am Mystery that's an actual thing by the way. Even before a global health crisis took the shape of COVID-19, people around the world were finding themselves sleep-deprived, awake in the middle of the night. You might be someone who says, no matter what you do, you just can't sleep. Sometimes you know why your thoughts are racing, or a nightmare has startled you into consciousness. Other nights you might toss and turn, and just as you finally doze off, the alarm blares. This book was written for you. It explores why you're awake, how you can manage your mind at night, and what might help if it's your dream content wreaking havoc. Drawing on nearly two decades of therapeutic work, research, and an ancient wisdom proven to helpfully manage the mind, Delphi connects the dots between sleep, dreams, and our mental health. She particularly highlights the impact of grief and loss on our well-being, which can ultimately affect the quality of our night-time rest, even if no one has died. Her book guides the reader on a journey to make friends with night-time, learning what the dark might have to offer to achieve a calmer, healthier, happier life. [The Diary of Ralph Josselin](#).

[1616-1683](#) Ralph Josselin, 1991-05-16. Josselin was vicar of Earls Colne, Essex, from 1641 until his death in 1683, and this is the intimate record of his ministry and his private doubts and triumphs as a Christian that give the Diary its shape. As a prosperous farmer, he also noted details of harvests, accounts of the weather, and farming methods, which piece together a picture of yeoman farming at that time. As father and husband, he felt impelled to record a series of observations on family life that seem unique for this period. Recognized as one of the great seventeenth-century diaries, ranging over topics from sin and disease, dreams and money to millenarianism and the Civil War, this richly rewarding document reveals Josselin as a sympathetic and entirely human figure and provides fascinating insights into the thought world of seventeenth-century life.
