

McKesson Population Manager™

A new approach to registries and clinical integration

As healthcare reform intensifies, providers are under constant pressure to optimize and coordinate care delivery, improve patient outcomes and manage utilization — all while keeping an eye on costs and contracts. If you're planning on assuming more financial risk for whole populations of patients, how do you get from where you are to where you want to be?

Before you can decide how much risk you can assume, you need to understand your patient populations and arm yourself with the information, processes and tools needed to effectively analyze and manage risk and quality.

McKesson has the expertise and solutions to help you tackle the two most common issues providers face as they evolve into an accountable care organization (ACO): understanding your patient populations and being accountable for the quality and cost of care.

Improve your care delivery

Through intensive collaboration with physicians, pharmacists, business and IT experts, we developed McKesson Population Manager™, a powerful network platform for clinical integration and accountable care programs. McKesson Population Manager can

help you drive improvements in care delivery, population health, and clinical and financial performance, helping you earn more quality incentive revenues while improving patient outcomes.

Unlike disease registries, which only provide a simple listing of patients with a common disease, such as diabetes, McKesson Population Manager offers clinical intelligence to help improve care and compliance with evidence-based clinical guidelines. Embedded algorithms for both preventive care and chronic conditions help you identify patients in need of care, while sophisticated workflows help guide clinical and patient behavior to foster care improvements.

McKesson Population Manager helps you reduce gaps in care, streamline workflows and improve compliance with quality measures and care guidelines, including Healthcare Effectiveness Data and Information Set (HEDIS), Integrated Healthcare Association (IHA) and Physician Quality Reporting System (PQRS).

And, when you are ready, you can seamlessly add the McKesson Risk Manager™ solution to help manage cost and utilization in your risk contracts.

Why choose McKesson Population Manager?

McKesson Population Manager offers advanced features and flexible configurable functions:

- An enterprise information platform that aggregates and presents data from multiple sources across the provider network, including electronic health records (EHRs), practice management systems, pharmacies and labs, and more
- Condition-specific registries that help you manage populations, track individual patients and drill down to detailed data on clinical events and lab results
- Integrated feedback loops that support provider review, so they can document and remove ineligible patients from registries and improve confidence in the system
- An embedded methodology that accurately attributes patients to primary care physicians and specialists, helping prompt the appropriate physician to intervene with the correct action when needed (includes configurable contingent logic)
