inhabited world from the poles to the tropics even in non English speaking countries like China and Japan The primary effect of this lockdown has been on the economy from developed to developing countries there are none that may claim to have escaped the paralyzing debilitation caused by an instant and total absence of all forms of commerce Long queues in front of provision stores slow starvation as savings dried up people begging for scraps people dying by the roadside and railway tracks as they set out to walk the length and breadth of the country en route to their homes from their places of work all these shocking pictures are now part of our heritage An online society has cropped up as the new normal one sustained by internet apps tweeter and face book and so on It is needless to say that this digital society is the child of no other than the Corona virus What is different today is the loss of vision Men have distanced themselves not only from their friends but also from their productive energy and sustainable creativity

Ethical Principles and Economic Transformation - A Buddhist Approach Laszlo Zsolnai,2011-05-17 Buddhism points out that emphasizing individuality and promoting the greatest fulfillment of the desires of the individual conjointly lead to destruction The book promotes the basic value choices of Buddhism namely happiness peace and permanence Happiness research convincingly shows that not material wealth but the richness of personal relationships determines happiness Not things but people make people happy Western economics tries to provide people with happiness by supplying enormous quantities of things and today's dominating business models are based on and cultivates narrow self centeredness But what people need are caring relationships and generosity Buddhist economics makes these values accessible by direct provision Peace can be achieved in nonviolent ways Wanting less can substantially contribute to this endeavor and make it happen more easily Permanence or ecological sustainability requires a drastic cutback in the present level of consumption and production globally This reduction should not be an inconvenient exercise of self sacrifice In the noble ethos of reducing suffering it can be a positive development path for humanity
