The Burden of Educational Exclusion ,2010-01-01 School was nothing but a taboo for me concludes Johannah a young South African after recounting her life story Johannah is one of the early school leavers who features in this book Figures on participation in education in Africa show that despite government agreements and policies developed under the banner of Education for All this remains a remote goal In several countries programmes on Universal Primary Education have improved access to education but do those who enter school remain there until they have reached a suitable level Do they acquire enough competences at primary and secondary school to survive the tough daily life in sub Saharan countries What happens to children and young adults who leave school early What measures can be taken to prevent them from doing so This book is based on research carried out in Eastern and Southern Africa by scholars from Africa and the Netherlands who cooperated within the framework of the ESLA project The contributions to this book reflect the exchanges and discussions which took place in this research group initiated by staff of Mzumbe University in Tanzania Uganda Martyrs University and the University of Groningen in the Netherlands The group aims to go beyond figures and uncover the causes effects and stories of the young people involved as well as explore promising new strategies with which to address their needs As early school leaving is not exclusively an African problem a contribution on the Dutch situation is also included The book concludes that exclusion from education has far reaching effects not only for the young people involved but also for the society in which they live The burden of educational exclusion should be the joint responsibility of developing and developed countries The authors hope the book will contribute not only to a greater understanding of the phenomenon of early school leaving but also challenge it in terms of developing policies and programmes that can prevent educational exclusion and support those who already find themselves in such a situation Digital Media and the Preservation of Indigenous Languages in Africa

Fulufhelo Oscar Makananise, Shumani Eric Madima, 2024-06-18 Digital Media and the Preservation of Indigenous Languages in Africa Toward a Digitalized and Sustainable Society presents cutting edge epistemological debates academic case studies and empirical research from African scholars on the intersection of digital media technologies artificial intelligence and the preservation of Indigenous languages in the continent This edited collection provides a methodology for African researchers practitioners and marginalized communities to integrate digital technologies into their lives to foster innovation advance the documentation and preservation of underrepresented languages and promote African centered epistemologies Contributors to this edited volume argue that African societies should acknowledge and embrace digital media platforms Despite these platforms potential as sites of epistemic colonialism they are essential for promoting ways of life that reflect the diversity and importance of Indigenous cultures For Indigenous languages and local epistemologies to flourish in this rapidly evolving technological era African communities must employ a variety of contemporary practices and strategies to document protect

and preserve ways of being that have formerly been relegated to the periphery *Turfloop a Conscious Pariah* Chris Kanyane Kanyane, 2010-01-06 This book provides reflections on the butterfly effect on how Turfloop brought in the Age of Barack Obama What is the Age of Barack Obama To paraphrase Dr Ineke Van Kessel a prominent historian at the Leiden University in the Netherlands The University of the North also known as Turfloop played a vital role as the center of communication coordination ideological direction the engine of bringing the new South Africa was University of the North We approached this book like detectives Fortunately in our detective work we were not concerned with a particular agenda we were not trying to prove that a certain method of thinking was right or wrong We didnt want this book to be filled with personal opinions and biases We wanted this book to be juice and accessible to every person who reads it in whatever corner of the world We have to back up our story with facts of course and get other people to do practical analysis and later we added our own perspectives When we completed writing this book we passed it around amongst critical people spread across the globe Most of them said that the book is somehow highbrow and at the same time all together lowbrow which came as a compliment A lot of people are somewhere in between We want this book to embody that because there are many people there we want them to appreciate this book **Psychology in Society** ,2008
