4 pages | 781 words

There are many jobs available with a degree in Biological Laboratory Science. Possible careers (gone over in BLS orientation) include industry research, academics, government, sales or marketing, and project management. Other career paths include professional degrees or postgraduate degrees. The career I am most interested in is the Forensic Science Technician career. The Salary for Forensic Science Technicians varies greatly. The lowest 10 percent paid \$34,600 and the highest 10 percent paid \$97,200. State governments are the highest paying starting around \$59,250, local government and testing laboratories falling in the middle at \$58,950 and \$48,000 respectively, while medical and diagnostics laboratories start at the least amount at around \$40,650. Forensic science technicians work in both laboratories and on crime scenes. These duties include according to the Bureau of Labor Statistics: at crime scenes "analyzing crime scenes to determine what evidence should be collected and how take photographs of the crime scene and evidence make sketches of the crime scene record observations and findings, such as the location and position of evidence collect evidence, including weapons, fingerprints, and bodily fluids catalog and preserve evidence for transfer to crime labs reconstruct crime scenes". According to the Bureau of Labor Statistics, in laboratories the duties required are "performing chemical, biological, and microscopic analyses on evidence taken from crime scenes exploring possible links between suspects and criminal activity, using the results of DNA or other scientific analyses consulting with experts in specialized fields, such as toxicology (the study of poisons and their effect on the body) and odontology (a branch of forensic medicine that concentrates on teeth)". To be a Forensic Science Technician it is required to have a bachelor's degree in a natural science, such as chemistry or biology, or in forensic science. Many forensic scientists will have an undergraduate degree in the natural sciences and a master's degree in forensic science. Forensic science technicians will receive on-the-job training before they can work on cases independently. Certifications and licenses are not usually necessary for the entry-level of this job. Ideally, I would like to work in either Illinois or New York Certain areas in Illinois and New York have a good need for forensic scientists, normally located close to a large city. Illinois has an employment of 450 and a location quotient of .69. New York has an employment of 840 and a location quotient of .81. These numbers are higher than the average for the United States. Possible employers include the New York City Department of health/mental hygiene, the Federal Bureau of Investigation and the Department of State Police State of Massachusetts. All three of these companies are state or government-run. I am interested in a state or government-run company because I would like to have the flexibility of traveling. Some of the skills a forensic science technician employer is looking for are communication, critical-thinking, detail-oriented, math, science, and problem-solving skills. For communication skills, a forensic science technician is required to write reports and testify in court. They also have to be able to work well with other law enforcement officials and specialists. Critical-thinking skills are also a good skill to have,...

Contemplative offers its readers a scholarly examination of her essays within the context of philosophy and aesthetic theory. This study sets up a dialogue between her works and their philosophical counterparts in France and Germany including the works of Hannah Arendt, Jacques Derrida, Roland Barthes, and Walter Benjamin. Artists and concepts discussed in relation to Sontag's essays include the works of Andy Warhol, Pop Art, French New Wave Cinema, the music of John Cage, and the cinematic art of Robert Bresson, Leni Riefenstahl, Ingmar Bergman, and Jean-Luc Godard. Her aesthetic formalism is compared with Harold Bloom, and this is the first volume to examine her late works and their position within the American events of 9/11, 01, and the War on Terrorism. **Ski**, 2003-03 **Business School Essays That Made a Difference, 6th Edition** The Princeton Review, 2015-02-03 The inside word on business school admissions. That's equivalent to being the first loser. Anybody can live life when things are going well; the real test comes when adversity strikes and setbacks nail you. When that happens, how are you going to respond? It's been five years since Pat Williams learned firsthand what an oncologist was. Five years since he had to actually prove that he bought into his own message in order to beat the cancer attacking the plasma cells in his bone marrow. Five years since he responded to the diagnosis with a new mission for remission and determined to face his mission with one goal: winning. Now Williams and Kerasotis share that same focus and passion with readers by identifying 12 qualities of extreme winners and by providing all of the tools they need to implement each one. When put into practice, which readers can do right away, there is no telling what can happen. And there is no telling what they can accomplish. **The Role of Mortgage Brokers in the Mortgage Finance Market** United States. Congress. House. Committee on Banking and Financial Services.
