Myopia Of Greed:

The Triumph of Economic Freedom Donald J. Boudreaux, Phil Gramm, 2025-05-13 This readable and important book makes a strong case that the received version of economic history taught in high schools and colleges across the country is off the mark and that its errors distort current policy debates It deserves attention from economic policymakers of all persuasions LAWRENCE SUMMERS former Secretary of the Treasury President Emeritus Harvard University Since the dawn of the Industrial Revolution capitalism has unleashed unimaginable growth in opportunity and prosperity And yet at key points in American history economic disruption has led to a greater role for government ostensibly to protect against capitalism's excesses Today government regulates mandates subsidizes and controls a growing share of the American economy In this book Phil Gramm one of America's premier public policy advocates and noted economist Donald J Boudreaux look at the seven events and issues in American history that define for most Americans the role of government and how the 21st century world works To many Americans these 5 periods of American history the Industrial Revolution Progressive Era Great Depression decline of America's postwar preeminence in world trade and the Great Recession along with the existing levels of income inequality and poverty represent strong evidence for expanding government in American life Gramm and Boudreaux argue that the evidence points to a contrary verdict government interference and failed policies pose the most significant threat to economic freedom Setting up each topic with a just the facts approach that defies partisanship Gramm and Boudreaux provide a compelling and highly readable powerful reassessment that will challenge open minded readers to rethink the conventional wisdom and the policies that spring from them *Myopia of Greed* Joseph Halsted, 2015-01-20 Historical novel based on facts about the migration of enslaved people in the American south to the new free colony of Freetown in Sierra Leone Maame a teenage girl is awakened by a screaming hoard of savages Dragged from her home she's chained with her neighbors the young and elderly ruthlessly murdered before her eyes Force marched to a slave pen she awaits shipment in a stinking slave ship's hold to an auction across the sea Caleb is nearly whipped to death for merely helping a sick woman With two friends he barely escapes through the Underground Railway closely tracked by Tom Black an implacable bounty hunter seeking reward for his return dead or alive The two meet in New England as Jake Shaw a ship owner and his family spirit them to safety in Nova Scotia and then on to Freetown in Sierra Leone a free colony established by The Saints in London The bounty hunter visualizing huge profits from the value of so many escapees is relentless Enlisting slave ship captains and even the French Navy he intends to sack the colony and resell its citizens back to slavery *Myopia of Greed* is an uplifting tale inspired by historical facts including the final battle between the largely undefended Freetown citizenry and the French Navy *Most Good, Least Harm* Zoe Weil, 2009-01-06 With a world steeped in materialism environmental destruction and injustice what can one individual possibly do to change it While the present obstacles we face may seem overwhelming author and humane educator Zoe Weil shows us that change doesn't have to start with an army It

starts with you Through her straightforward approaches to living a MOGO or most good life she reveals that the true path to inner peace doesn't require a retreat from the world Rather she gives the reader powerful and practicable tools to face these global issues and improve both our planet and our personal lives Weil explores direct ways to become involved with the community make better choices as consumers and develop positive messages to live by showing readers that their simple decisions really can change the world Inspiring and remarkably inclusive of the interconnected challenges we face today Most Good Least Harm is the next step beyond green a radical new way to empower the individual and motivate positive change

Deadly Imbalances Randall L. Schweller, 1998 Scholars frequently portray the Second World War as an epic morality play driven by a villain Hitler and a sinner Chamberlain Deadly Imbalances offers a new approach combining both the attributes of states and the structure of the international system to explain the origins and causes of the war Central to Schweller's analysis is the argument that the structure of the international system was tripolar with Germany the Soviet Union and the United States as the three central powers and that this needs to be considered in any examination of the antecedent causes and crucial events of the war

The Behavior of Assurance Professionals Olof P. G. Bik, 2010 The complexity of human behavior challenges our explanatory powers Yet in this day and age we desperately try to manage and control the behavior of our corporate citizens through rules codes systems and procedures alike This study is an illustration that true human behavior cannot simply be controlled by more of such rules Instead it is driven by many psychological cultural contextual and environmental factors The focus of this study is the influence of cross national cultural differences in the context of the professional behavior of auditors based on the central question Is auditors professional behavior affected by crossnational cultural differences and if so how Being based on grounded theory in part validated within an international accounting organization this study is the first to provide a more profound in depth and contextualized analysis and understanding of the effect of cross national cultural differences on the behavior of professionals in general and that of auditors in particular

Public Policy Jonathan Boston, Andrew Bradstock, David L. Eng,2010-10-01 Ethics is a vigorously contested field There are many competing moral frameworks and different views about how normative considerations should inform the art and craft of governmental policy making What is not in dispute however is that ethics matters The ethical framework adopted by policy analysts and decision makers not only shapes how policy problems are defined framed and analysed but also influences which ethical principles and values are taken into account and their weighting As a result ethics can have a profound impact both on the character of the policy process and the choices made by decision makers PUBLIC POLICY WHY ETHICS MATTERS brings together original contributions from leading scholars and practitioners with expertise in various academic disciplines including economics philosophy physics political science public policy and theology The volume addresses three main issues first the ethical considerations that should inform the conduct of public officials and the task of policy analysis second the ethics of climate change and third ethics and economic policy While the contributors have varying views on these important issues

they share a common conviction that the ethical dimensions of public policy need to be better understood and given proper attention in the policy making process

Africa Reunite or Perish Nkuzi Mhango, 2015-12-01 *Africa Reunite or Perish* is a daring and timely book that explores the essence and nefariousness of neocolonialism in a purportedly independent Africa. The book shows how Africa spends billions of dollars in pseudo threats among African countries due to colonially entrenched fear and war mongering. The book is emphatic on deconstruction and decolonisation as a categorical imperative for the reunification of Africa beyond the narrow confines of current nation states. Mhango takes a diagnostic cum prognostic approach in discussing Africa's predicaments and in identifying and proposing solutions to problems confronting Africans. The book ascertains Africa's untapped potentials by proving how Africa can live without the infamy of excruciating dependency and beggarliness. It makes a compelling case for African unity beyond the tokenism of officialdom. It prescribes a truly pan African driven reunification of Africa as the only means of reclaiming the glory she used to enjoy before she was savagely partitioned.

The Rapidly Transforming Chinese High-Technology Industry and Market Nir Kshetri, 2008-07-31 A number of indicators point to rapid and extraordinary shifts in the Chinese high technology landscape. This book places special emphasis on ultra modern and crucial ICT industries in which Chinese players possess a competitive advantage. It analyzes how formal and informal institutions and associated feedback mechanisms have influenced the Chinese high technology industry and market. Finally the book deeply investigates the nature sources and quality of key ingredients related to the Chinese high technology industry and provides an insight into the status and locus of this industry. Draws on multiple theoretical lenses for studying the Chinese high technology industry and markets. Focuses on a range of technology industries. Special emphasis is placed on ultra modern and crucial ICT industries in which Chinese players possess a competitive advantage.

Automating the Design of Data Mining Algorithms Gisele L. Pappa, Alex Freitas, 2009-10-27 Data mining is a very active research area with many successful real world applications. It consists of a set of concepts and methods used to extract interesting or useful knowledge or patterns from real world datasets providing valuable support for decision making in industry business government and science. Although there are already many types of data mining algorithms available in the literature it is still difficult for users to choose the best possible data mining algorithm for their particular data mining problem. In addition data mining algorithms have been manually designed therefore they incorporate human biases and preferences. This book proposes a new approach to the design of data mining algorithms instead of relying on the slow and ad hoc process of manual algorithm design. This book proposes systematically automating the design of data mining algorithms with an evolutionary computation approach. More precisely we propose a genetic programming system a type of evolutionary computation method that evolves computer programs to automate the design of rule induction algorithms a type of classification method that discovers a set of classification rules from data. We focus on genetic programming in this book because it is the paradigmatic type of machine learning method for automating the generation of programs and because it has the advantage

of performing a global search in the space of candidate solutions data mining algorithms in our case but in principle other types of search methods for this task could be investigated in the future

Getting There Stephen B. Goddard,1996-11-15 From the glory days of the railroad to today's gridlocked six lane highway *Getting There* dramatizes America's shift from rail to road transportation how it has robbed Americans of the choice of travel options enjoyed by Europeans and why it threatens the nation's economic future Stephen B Goddard reveals how government joined automakers and roadbuilders to nearly destroy the rails and why the 21st century will witness high tech remedies and a railroad resurgence

Anatomy of Science Fiction Donald E. Morse,2009-03-26 This wide ranging collection of essays reopens the connection between science fiction and the increasingly science fictional world Kevin Alexander Boon reminds us of the degree to which the epistemology of science fiction infects modern political discourse K roly Pint r explores the narrative structures of utopian estrangement and Tam s B nyei and Brian Attebery take us deeper into the cultural exchanges between science fiction and the literary and political worlds In the second half Donald Morse Nicholas Ruddick and va Federmayer look at the way in which science fiction has tackled major ethical issues while Amy Novak and K lm n Matolcsy consider memory and evolution as cultural batteries The book ends with important discussions of East German and Hungarian science fiction by Usch Kiausch and Donald Morse respectively I envisage that the book will find a market both among academics and as a recommended text to undergraduates as it offers interesting essays on important readers The tendency for science fiction to be offered as a literature class to science majors is not usually considered but this book would be particularly appropriate for such a market Dr Farah Mendelsohn Middlesex University

The Oxford Handbook of Ethics and Economics Mark D. White,2019-06-06 Economics and ethics are both valuable tools for analyzing the behavior and actions of human beings and institutions Adam Smith the father of modern economics considered them two sides of the same coin but since economics was formalized and mathematicised in the late 1800s and early 1900s the fields have largely followed separate paths The Oxford Handbook of Ethics and Economics provides a timely and thorough survey of the various ways ethics can does and should inform economic theory and practice The first part of the book Foundations explores how the most prominent schools of moral philosophy relate to economics asks how morals relevant to economic behavior may have evolved and explains how various approaches to economics incorporate ethics into their work The second part Applications looks at the ethics of commerce finance and markets uncovers the moral dilemmas involved with making decisions regarding social welfare risk and harm to others and explores how ethics is relevant to major topics within economics such as health care and the environment With esteemed contributors from economics and philosophy The Oxford Handbook of Ethics and Economics is a resource for scholars in both disciplines and those in related fields It highlights the close relationship between ethics and economics in the past while and lays a foundation for further integration going forward

On Startups: Advice and Insights for Entrepreneurs Dharmesh Shah, 2012-12-09 Note from the Author Hi my name is Dharmesh and I m a startup addict And chances are if you re reading this you have at least a mild obsession as well This book is based on content from the OnStartups com blog The story behind how the blog got started is sort of interesting but before I tell you that story it ll help to understand my earlier story As a professional programmer I used to work in a reasonably fun job doing what I liked to do write code Eventually I got a little frustrated with it all so at the ripe old age of 24 I started my first software company It did pretty well It was on the Inc 500 list of fastest growing companies three times It reached millions of dollars of sales and was ultimately acquired I ran that first company for over 10 years working the typical startup hours When I sold that company I went back to school to get a master s degree at MIT I ve always enjoyed academics and I figured

this would be a nice soft landing and give me some time to figure out what I wanted to do with my life As part of my degree requirements I had to write a graduate thesis I titled my thesis On Startups Patterns and Practices of Contemporary Software Entrepreneurs And as part of that thesis work I wanted to get some feedback from some entrepreneurs So I figured I d start a blog I took the first two words of the thesis title On Startups discovered that the domain name OnStartups com was available and was then off to the races The blog was launched on November 5 2005 Since then the blog and associated community have grown quite large Across Facebook LinkedIn and email subscribers there are over 300 000 people in the OnStartups com audience This book is a collection of some of the best articles from over 7 years of OnStartups com The articles have been topically organized and edited I hope you enjoy them
