**Compendium of Polymer Terminology and Nomenclature** Richard G Jones,Edward S Wilks,W. Val Metanowski,Jaroslav Kahovec,Michael Hess,Robert Stepto,Tatsuki Kitayama,2009-01-19 The IUPAC system of polymer nomenclature has aided the generation of unambiguous names that reflect the historical development of chemistry However the explosion in the circulation of information and the globalization of human activities mean that it is now necessary to have a common language for use in legal situations patents export import regulations and environmental health and safety information Rather than recommending a unique name for each structure rules have been developed for assigning preferred IUPAC names while continuing to allow alternatives in order to preserve the diversity and adaptability of nomenclature Compendium of Polymer Terminology and Nomenclature is the only publication to collect the most important work on this subject into a single volume It serves as a handy compendium for scientists and removes the need for time consuming literature searches One of a series issued by the International Union of Pure and Applied Chemistry IUPAC it covers the terminology used in many and varied aspects of polymer science as well as the nomenclature of several different types of polymer including regular and irregular single strand organic polymers copolymers and regular double strand ladder and spiro organic polymers
