Kelly, 1992 The Liverpool Dock Engineers Adrian Jarvis, 1996 The Liverpool Dock Engineers is the first book to be written specifically on dock engineers and their work Using the Mersey Docks and Harbour archive Adrian Jarvis reveals more detail of dock engineering work at every level the theory and the practice the site management and working methods than has been possible before Particular attention has been paid to finding the usually neglected men at third and fourth tiers in the structure who were key figures in every engineering organisation or project By the time A G Lyster retired as Engineer in Chief in 1913 dock engineering embraced such a range of specialisms that it was no longer possible for one man to do as Hartley had done and master every aspect of it The days of his degree of integration were numbered but while they lasted the development of dock engineering was almost synonymous with the work of the Liverpool dock engineers What Price the Poor? Ann M. Woodall, 2017-05-15 In this fascinating book Ann Woodall investigates and compares the work and thought of William Booth and Karl Marx who both arrived in London in 1849 She draws comparisons between their responses to the intractability of the poverty of the submerged tenth of London s population and argues that Booth s pioneering work in establishing the Salvation Army and the development of Marx s economic theory began in their interactions with the London residuum Each recognised that much of the suffering was caused by the workings of laissez faire capitalism and that its total solution required a challenge to the existing economic system What Price the Poor raises important questions about the relationship between theological discourse and the sociological imagination and it firmly places the development of theoretical and practical social analysis and application within the context of social history It will appeal to all with interests in classical sociology and the history of social activism
