**The Empathy Gap** William Collins, 2021 From the ebook Preface This book majors on the presentation of empirical evidence in the form of data The most digestible form for communicating such material is through the use of Tables and Figures generally graphs Consequently the book has a great many Tables and Figures and the latter are often in colour Viewing on a device capable of rendering colours is therefore recommended although monochrome will be adequate in most cases The Empathy Gap proposes the thesis that men and boys are extensively disadvantaged across many areas of life including in education healthcare genital integrity criminal justice domestic abuse working hours taxation pensions paternity homelessness suicide sexual offences and access to their own children after parental separation The claim is justified in the book by empirical evidence mostly but not exclusively from the UK involving nearly 1 000 references 179 Figures and 49 Tables To most people of both sexes this will appear to be a perverse perspective as disadvantage has become the province of women girls and minorities not males Yet the empirical case supporting the disadvantages suffered by men and boys is undeniable to the objective mind But if this is so why is the popular perception that males are privileged whereas disadvantage is the province of the opposite sex Why do the male disadvantages go largely unremarked by both sexes if they are so pervasive Presenting the case for widespread and substantial male disadvantage is also a challenge to the usual hegemonic paradigm of feminist theory These issues are addressed within The Empathy Gap by presenting an entirely different orientation on the social psychology of relations between the sexes Out goes the idea of an oppressive patriarchy Instead a man's participation in the human pair bond is seen to be altruistic a phenomenon arising originally from evolution and enacted in the individual via the emotional psyche This is the origin of an asymmetry in the perception of the sexes which normalises the preferencing of females and therefore inevitably disadvantages males as a corollary The successful evolved strategy involves male utility and relative male disposability the latter being facilitated by a muted empathy for males by both sexes the empathy gap Rather than working to overcome this male disposability as a true egalitarian movement would have done feminism has fed upon it and amplified it The feminist project relies upon the true state of affairs remaining unacknowledged and the empathy gap is instrumental in its own invisibility In respect of this theory the author makes no claim for originality The ideas presented have been circulating within the sub culture for decades However the focus of the book is to show how these ideas are manifest in practice

Errors and Misconceptions in Maths at Key Stage 2 Mike Spooner, 2012-07-26 The activities in this book are designed both to help children to learn and to understand math concepts and also to prepare them for taking SATS papers at KS2 There is plenty of research evidence to suggest that children are helped in their understanding of math problems if teachers focus on common misconceptions and if children are given opportunities for discussion and explanation of their own understanding Children can also feel stigmatized by being made to focus on their own errors Mike Spooner has developed activities that present already completed work which children then

assess correct and discuss in this way they can analyze mistakes without damage to their own self esteem The activities are presented in the same format as the SATS papers to give children practice in coping with that format The book also contains writing frames that children can use to structure their discussions of math problems      **Ks2 Mathematics Sats Practice Papers** CGP Books, Richard Parsons, 2002-10-01 KS2 Maths SATs Practice Papers Levels 3 5      **SATs KS2 Year 6 Maths Reasoning Papers 3** A.
