Healthy, Resilient, and Sustainable Communities After Disasters Institute of Medicine, Board on Health Sciences Policy, Committee on Post-Disaster Recovery of a Community's Public Health, Medical, and Social Services, 2015-09-10 In the devastation that follows a major disaster there is a need for multiple sectors to unite and devote new resources to support the

rebuilding of infrastructure the provision of health and social services the restoration of care delivery systems and other critical recovery needs In some cases billions of dollars from public private and charitable sources are invested to help communities recover National rhetoric often characterizes these efforts as a return to normal But for many American communities pre disaster conditions are far from optimal Large segments of the U S population suffer from preventable health problems experience inequitable access to services and rely on overburdened health systems A return to pre event conditions in such cases may be short sighted given the high costs both economic and social of poor health Instead it is important to understand that the disaster recovery process offers a series of unique and valuable opportunities to improve on the status quo Capitalizing on these opportunities can advance the long term health resilience and sustainability of communities thereby better preparing them for future challenges *Healthy Resilient and Sustainable Communities After Disasters* identifies and recommends recovery practices and novel programs most likely to impact overall community public health and contribute to resiliency for future incidents This book makes the case that disaster recovery should be guided by a healthy community vision where health considerations are integrated into all aspects of recovery planning before and after a disaster and funding streams are leveraged in a coordinated manner and applied to health improvement priorities in order to meet human recovery needs and create healthy built and natural environments The conceptual framework presented in *Healthy Resilient and Sustainable Communities After Disasters* lays the groundwork to achieve this goal and provides operational guidance for multiple sectors involved in community planning and disaster recovery *Healthy Resilient and Sustainable Communities After Disasters* calls for actions at multiple levels to facilitate recovery strategies that optimize community health With a shared healthy community vision strategic planning that prioritizes health and coordinated implementation disaster recovery can result in a communities that are healthier more livable places for current and future generations to grow and thrive communities that are better prepared for future adversities

growing economy and provides a comprehensive overview of the policies developed to address the environmental crisis. Leading international scholars and practitioners examine China's environmental governance efforts from an interdisciplinary perspective. Divided into five parts, the handbook covers the following key issues: Part I Development of Environmental Policy in China; Actors and Institutions; Part II Key issues and Strategies for Solution; Part III Policy Instruments and Enforcement; Part IV Related Policy Fields: Conflicts and Synergies; Part V China's Environmental Policy in the International Context. This comprehensive handbook will be an invaluable resource to students and scholars of environmental policy and politics, development studies, Chinese studies, geography, and international relations.

Disaster Response Practices Michael Madigan, 2024-01-12. This book provides guidelines for emergency managers, responders, and health care professionals to establish a mass casualty/mass fatality management plan. It identifies a need for a stronger and more global management structure for MC/MF events that includes standardized practices of identification, disposition, and possible repatriation to restore the situation to pre-event levels. This book covers this comprehensive process, including disaster mortuary, operational response teams, DMORTs, simple triage, and rapid treatment (START) and national nurse response teams. It also demonstrates leadership in MC/MF events within government agencies, the public sector, and international organizations, featuring case studies, scenario questions, and summaries of lessons learned.
