Computational Systems Biology of Cancer Emmanuel Barillot, Laurence Calzone, Philippe Hupe, Jean-Philippe Vert, Andrei Zinovyev, 2012-08-25 The future of cancer research and the development of new therapeutic strategies rely on our ability to convert biological and clinical questions into mathematical models integrating our knowledge of tumour progression mechanisms with the tsunami of information brought by high throughput technologies such as microarrays and next generation sequencing Offering promising insights on how to defeat cancer the emerging field of systems biology captures the complexity of biological phenomena using mathematical and computational tools Novel Approaches to Fighting Cancer Drawn from the authors decade long work in the cancer computational systems biology laboratory at Institut Curie Paris France Computational Systems Biology of Cancer explains how to apply computational systems biology approaches to cancer research The authors provide proven techniques and tools for cancer bioinformatics and systems biology research Effectively Use Algorithmic Methods and Bioinformatics Tools in Real Biological Applications Suitable for readers in both the computational and life sciences this self contained guide assumes very limited background in biology mathematics and computer science It explores how computational systems biology can help fight cancer in three essential aspects Categorising tumours Finding new targets Designing improved and tailored therapeutic strategies Each chapter introduces a problem presents applicable concepts and state of the art methods describes existing tools illustrates applications using real cases lists publically available data and software and includes references to further reading Some chapters also contain exercises Figures from the text and scripts data for reproducing a breast cancer data analysis are available at www.cancer-systems-biology.net

Chemical Induction of Cancer Joseph C. Arcos, Mary F. Argus, Yin-tak Woo, 2012-12-06 In the approach to the analysis of disease including of course cancer two major thrusts may be distinguished These may be referred to in shorthand as agents and processes the causative agents chemical microbial physical environmental and psychosocial and the organismic processes initiated and furthered by the agents culminating in observable pathology at the macromolecular cytological histological organ function locomotor and behavioral levels The past 25 years since the appearance of the first volume of the predecessor series 1 authored by the Editors of this present volume have seen an impressive number of studies on chemicals and other agents as etiologic factors in the induction of cancer The major emphasis has been on the discovery of many chemical carcinogens of widely different structures their metabolism by various tissues and cells and in turn their molecular biochemical effects on the cells This rapidly expanded body of information as effectively covered in the predecessor volumes is an excellent entree to the second half of the overall problem of chemical carcinogenesis the processes The active agents trigger a large array of molecular biochemical alterations to which the target cells target tissues and target organisms respond in many select and common ways This second major aspect of the induction of cancer by chemicals and by other agents the sequence of cellular and tissue changes clearly relevant to cancer remains

the challenge for the future Bayesian Biostatistics Emmanuel Lesaffre, Andrew B. Lawson, 2012-08-13 The growth of biostatistics has been phenomenal in recent years and has been marked by considerable technical innovation in both methodology and computational practicality One area that has experienced significant growth is Bayesian methods The growing use of Bayesian methodology has taken place partly due to an increasing number of practitioners valuing the Bayesian paradigm as matching that of scientific discovery In addition computational advances have allowed for more complex models to be fitted routinely to realistic data sets Through examples exercises and a combination of introductory and more advanced chapters this book provides an invaluable understanding of the complex world of biomedical statistics illustrated via a diverse range of applications taken from epidemiology exploratory clinical studies health promotion studies image analysis and clinical trials Key Features Provides an authoritative account of Bayesian methodology from its most basic elements to its practical implementation with an emphasis on healthcare techniques Contains introductory explanations of Bayesian principles common to all areas of application Presents clear and concise examples in biostatistics applications such as clinical trials longitudinal studies bioassay survival image analysis and bioinformatics Illustrated throughout with examples using software including WinBUGS OpenBUGS SAS and various dedicated R programs Highlights the differences between the Bayesian and classical approaches Supported by an accompanying website hosting free software and case study guides Bayesian Biostatistics introduces the reader smoothly into the Bayesian statistical methods with chapters that gradually increase in level of complexity Master students in biostatistics applied statisticians and all researchers with a good background in classical statistics who have interest in Bayesian methods will find this book useful Led into Mystery John de Gruchy, 2014-07-28 Led into Mystery is an unanticipated sequel to John de Gruchy's book Being Human Confessions of a Christian Humanist It was prompted by the untimely and tragic death of his eldest son Steve in February 2010 and the questions this posed about the meaning of life and death from the perspective of Christian faith **The Connected Leader** Emmanuel Gobillot, 2024-11-04 In today's fast paced world leaders must do more than just adapt they need to anticipate the radical shifts happening all around them Too often the focus on immediate challenges blinds them to the sweeping changes reshaping their environment True success demands agility a keen awareness of evolving stakeholder expectations and a bold cultural transformation In this fully updated edition of The Connected Leader Emmanuel Gobillot makes a compelling argument traditional leadership models are relics of the past He builds the case for a new kind of leadership that leverages informal social networks to reconnect with what stakeholders truly value Packed with original international case studies and unique diagnostic tools The Connected Leader is a treasure trove of insights Gobillot's global bestseller is essential reading for professionals aiming to harness the combined power of people and performance to create thriving organisations and drive meaningful change *Think, Learn, Succeed* Dr. Caroline Leaf, 2018-08-07 Our thought lives have incredible power over our mental emotional and even physical well being In fact our thoughts can either limit us to what we believe we can do or
