Possible Knowledge Debapriya Sarkar, 2023-04-04 The Renaissance scholars have long argued was a period beset by the loss of philosophical certainty In Possible Knowledge Debapriya Sarkar argues for the pivotal role of literature what early moderns termed poesis in the dynamic intellectual culture of this era of profound incertitude Revealing how problems of epistemology are inextricable from questions of literary form Sarkar offers a defense of poesis or literary making as a vital philosophical endeavor Working across a range of genres Sarkar theorizes possible knowledge as an intellectual paradigm crafted in and through literary form Sixteenth and seventeenth century writers such as Spenser Bacon Shakespeare Cavendish and Milton marshalled the capacious concept of the possible defined by Philip Sidney as what may be and should be to construct new theories of physical and metaphysical reality These early modern thinkers mobilized the imaginative habits of thought constitutive to major genres of literary writing including epic tragedy romance lyric and utopia in order to produce knowledge divorced from historical truth and empirical fact by envisioning states of being untethered from nature or reality Approaching imaginative modes such as hypothesis conjecture prediction and counterfactuals as instruments of possible knowledge Sarkar exposes how the speculative allure of the possible lurks within scientific experiment induction and theories of probability In showing how early modern literary writing sought to grapple with the challenge of forging knowledge in an uncertain perhaps even incomprehensible world Possible Knowledge also highlights its most audacious intellectual ambition its claim that while natural philosophy or what we today term science might explain the physical world literature could remake reality Enacting a history of ideas that centers literary studies Possible Knowledge suggests that what we have termed a history of science might ultimately be a history of the imagination

On the way to the best possible science Fanie De Beer, Braam Roux, 2016-07-31 The road to the best possible science runs along all kinds of undulatory paths of peer evaluation with the preferences assumptions prejudices and convictions of the evaluating readers It runs over the bumpy roads of ideological preferences and obstinacies that are mostly negatively affected muddled by the urge for power and money of institutional and political botching so that any pure outcome will be difficult to achieve There are also all sorts of detours and side tracks inspired by the obsession with instant solutions reductionistic and absolutising oversimplifications of the full multiple reality and the complex knowledge world but above all

by the intriguing fickleness of impulsive and ever present fallible human beings With this in mind the best possible science as emphasised in this publication can never be defined in any final sense nor can it ever without any doubt be achieved although this remains our firm ideal
