

## JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Globalisation and Services-driven Economic Growth Niels Beerepoot,Bart Lambregts,Jana Kleibert,2016-07-28 Following drastic shifts in the spatial organization of goods production increasingly fierce competition now forces firms also to look critically at how to organize the production of services While digitization and advances in information and communication technologies have enabled firms to unbundle service production processes the increased global availability of skilled labour

allows for the relocation of ever more of these processes around the world As a result a new geography of services production takes shape a geography that is defined by new interregional and international divisions of labour and held together by increasingly complex global services production networks This book examines how the reorganisation of services production alters relations between and generates different sets of challenges and opportunities for economic development in the Global North and the Global South Drawing from 11 case studies probing various aspects of services production in different parts of the world the book brings out the remarkable heterogeneity and transformative capacities of services It successively shows how global trade in services creates new interdependencies between services producing and services consuming regions reveals how services help to mitigate the impact of and contribute to recovery from economic crises in the Global North and demonstrates how services offshoring fosters economic development and service sector driven modernisation processes in the Global South The book s openness to the heterogeneous and dynamic nature of services production enlarges our understanding of which particular services in which spatiotemporal context have the capacity to generate good jobs contribute to productivity and drive economic growth The book stands out from other books in the field in that it combines perspectives on services driven transformations from both the Global North and the Global South and looks into the role of various services segments Based on pioneering empirical research and original data it offers a timely contribution to this growing debate The book provides valuable insights for students scholars and professionals interested in services services offshoring services driven growth and socioeconomic transformations in the Global North and South

reforms undertaken by the PLA in meeting its commander in chief's grand objectives set at the 2015 Central Military Commission Reform Work Meeting for China's armed forces to transform themselves into a more professional and modern military. Focusing on those changes since late 2016 at corps level and below, the first and second sections of the volume document the subsequent force structure and operational changes to the PLA's four conventional services and two newly established PLA branches, the Strategic Support Force and Joint Logistic Support Force. To that end, the contributors examine the reforms promulgated by the Chinese high command and measure them against observable developments in the PLA's power projection capabilities. In view of how the instrumentalization of military power is writ large in Beijing's strategic calculus and in regional hotspot issues, the final part of the book also provides pathbreaking insights into two critical but not so well understood phenomena: the now regular PLA aerial activities in the Taiwan Strait and the PLA Navy's submarine operations in the South China Sea. This book will be of much interest to students of East Asian security, Chinese politics and military and strategic studies in general.
