## **Fair Resource Allocation And Rationing At The Bedside:**

**Fair Resource Allocation and Rationing at the Bedside** Marion Danis, Samia A. Hurst, Len Fleck, Reidun Forde, Anne Slowther, 2014-10-02 Health systems need to set priorities fairly In one way or another part of this important task will fall to physicians How do they make judgments about resource stewardship and how should they do so How can they make such decisions in a manner that is compatible with their clinical duties to patients In this book philosophers bioethicists physicians lawyers and health policy experts make the case that priority setting and rationing contribute significantly to the possibility of affordable and fair healthcare and that clinicians play an indispensable role in that process The book depicts the results of a survey of European physicians about their experiences with rationing and other cost containment strategies and their perception of scarcity and fairness in their health care systems Responding to and complementing these findings commentators discuss why resource allocation and bedside rationing is necessary and justifiable The book explores how bedside rationing relates to clinical judgments about medical necessity and medical indications marginal benefits weak evidence based medicine off label use The book highlights how comparative studies of health care systems can advance more effective and fair bedside rationing through learning from one another From a practical standpoint the book offers a number of strategies for health care systems and clinicians to work in tandem to allocate and ration resources as fairly as possible how to foster more attention to fairness when rationing at the bedside how to avoid exacerbating health disparities when allocating resources how to teach about bedside rationing to students how to discuss rationing more explicitly in the public arena and in the doctor s office

**Prioritization in Medicine** Eckhard Nagel, Michael Lauerer, 2015-10-30 The gap between a rising demand for health care services on the one side and scarce resources on the other is leading to a growing pressure on decision making processes Hence prioritization in medicine has become an increasingly important issue for assuring stability of health systems and improving the capability of health care The present volume addresses normative dimensions of methodological and theoretical approaches the legal basis behind priority setting as well as international experiences concerning the normative framework and the process of priority setting It also examines specific criteria for prioritization and discusses economic evaluations Contributing authors from a broad range of scientific disciplines discuss prioritization within an international dialogue
