most spectacular powerful and dangerous machines from early jet fighters such as the F 86 Sabre and MiG 15 to today's F 22 Raptor and Eurofighter Typhoon Packed with first hand interviews with test and combat pilots from the world's air forces and illustrated with extensively researched and striking imagery G Force Flying the World's Greatest Aircraft is a thrilling ride alongside the pilots who fly the aircraft every day Featuring first hand accounts of combat over Korea in the MiG 15 endurance missions in the B 2 and bombing Iraqi targets in the Tornado this book puts the reader directly in the pilot's seat and will appeal to aviation enthusiasts of all ages The History of Western Palearctic Falcons Giovanni

Leonardi, 2025-04-22 Falcons have been exploited by humans as food source ornamental purposes or for the falconry practices There is a large historical literature in which falcons were often mentioned but always along broader topics mainly ancient falconry and poetry This book is the result of a parallel project developed during the preparation of Behavioral Ecology of Western Palearctic falcons published by Springer in 2020 The main aim is to use archaeological and historical sources on falcons to delineate the past distribution and population ecology of these predators in the Western Palearctic ecozone Ultimately the approach to the data is aimed at defining the population dynamics of falcons over time The relationship conflict with human populations is also placed in this context By putting falcons as a central subject of study this book outlines their path in the Western Palearctic from the Pleistocene to modern ornithology Backpacker, 2001-10

Behavioural Ecology of Western Palearctic Falcons Giovanni Leonardi, 2020-12-07 This monograph is the result of eight years of bibliographical and field research concerning several behavioural ecology aspects of the Palaearctic falcons For a while this book grew along with The Lanner falcon published in 2015 and revised in 2017 In both books the main aim was to provide a clear overview of the biology and ecology of these species In fact in the last 20 years the number of publications on falcons has grown tremendously and in parallel also those belonging to the so called grey literature The number of people involved is also increased by including both academics and nature lovers Many previously published books emphasized identification and offered little insights on the behavioural and ecological aspects of the species Very often the research on behavioural ecology remains closed within the confines of academic community By contrast a multitude of basic data is scattered in countless articles published in local magazines Many falcon species are easy to observe and study such as kestrels but others are more rare and localized In order to understand the survival strategies adopted by this group of avian predators it is necessary not to lose sight of the overall picture This book tries to explain the different survival strategies by examining through a few essential chapters some crucial aspects for all species The first chapter provides information on the genus *Falco* its genetics evolution and morphological peculiarities The other chapters deal with reproductive strategies competition exploitation of resources dispersal patterns communication and sociality One of the main objectives of this book is to produce an accessible but scholarly curated source of reference By understanding the most common species it is possible to provide a working framework for rarer and especially threatened falcon species
