DEXA 2004 the 15th International Conference on Database and Expert Systems Applications was held August 30 September 3 2004 at the University of Zaragoza Spain The quickly growing spectrum of database applications has led to the establishment of more specialized discussion platforms DaWaK Conference EC Web Conference EGOVConference Trustbus Conference and DEXA Workshop Every DEXA event has its own conference proceedings which were held in parallel with the DEXA Conference also in Zaragoza In your hands are the results of much effort The work begins with the preparation of the submitted papers which then go through the reviewing process The accepted papers are revised to final versions by their authors and are then arranged within the conference program All culminates in the conference itself For this conference 304 papers were submitted and I want to thank to all who contributed to it they are the real base of the conference The program committee and the supporting reviewers produced altogether 942 referee reports in average 3 1 reports per paper and selected 92 papers for presentation At this point we would like to say many thanks to all the institutions that actively supported this conference and made it possible These were University of Zaragoza FAW DEXA Association Austrian Computer Society Database Modeling and Design Toby J. Teorey, Sam S. Lightstone, Tom Nadeau, H.V. Jagadish, 2011-02-10 Includes bonus chapters from the book Physical database design *Fundamentals of Tool Design, Sixth Edition* John G. Nee, William Dufraine, John W. Evans, Mark Hill, 2010 For over 40 years students designers and manufacturing practitioners have used the Fundamentals of Tool Design to gain an in depth understanding of all the factors that impact tool success Fully illustrated readers will find practical design examples cost analysis calculations process data operating parameters and tips and techniques all of the concrete knowledge needed to spark innovation and resolve complex tooling challenges **Database Systems for Advanced Applications** Lizhu Zhou, Beng Chin Ooi, Xiaofeng Meng, 2005-05-04 On behalf of the Organizing Committee we would like to welcome you to the proceedings of the 10th International Conference on Database Systems for Advanced Applications DASFAA 2005 *Effective Databases for Text & Document Management* Shirley A. Becker, 2003-01-01 Focused on the latest research on text and document management this guide addresses the information management needs of organizations by providing the most recent findings How the need for effective databases to house information is impacting organizations worldwide and how some organizations that possess a vast amount of data are not able to use the data in an economic and efficient manner is demonstrated A taxonomy for object oriented databases metrics for controlling database complexity and a guide to accommodating hierarchies in relational databases are provided Also covered is how to apply Java triggers for X Link management and how to build signatures *Storage Networking Protocol Fundamentals* James Long, 2006 A comparative analysis of Ethernet TCP IP and Fibre Channel in the context of SCSI Introduces network administrators to the requirements of storage protocols Explains the operation of network protocols to

storage administrators Compares and contrasts the functionality of Ethernet TCP IP and Fibre Channel Documents the details of the major protocol suites explains how they operate and identifies common misunderstandings References the original standards and specifications so you can get a complete understanding of each protocol Helps you understand the implications of network design choices Discusses advanced network functionality such as QoS security management and protocol analysis Corporations increasingly depend on computer and communication technologies to remain competitive in the global economy Customer relationship management enterprise resource planning and e mail are a few of the many applications that generate new data every day Effectively storing managing and accessing that data is a primary business challenge in the information age Storage networking is a crucial component of the solution to meet that challenge Written for both storage administrators who need to learn more about networking and network administrators who need to learn more about storage Storage Networking Protocol Fundamentals is a concise introduction to storage networking protocols The book picks up where Storage Networking Fundamentals left off by focusing on the networking protocols that underlie modern open systems block oriented storage networks The first part of the book introduces you to the field of storage networking and the Open Systems Interconnection OSI reference model The second part compares networked storage technologies including iSCSI Small Computer Systems Interface over IP and Fibre Channel It also examines in detail each of the major protocol suites layer by layer within the OSI reference model The third part discusses advanced functionalities of these technologies such as quality of service QoS load balancing functions security management and protocol analysis You can read this book cover to cover or use it as a reference directly accessing the particular topics of interest to you Storage networking is a critical concept for today s businesses and this book provides a unique and helpful way to better understand it Storage networking is also continuously evolving and as such this book may be seen as an introduction to the information technology infrastructures of the future from the foreword by Claudio DeSanti vice chairman of the ANSI INCITS T11 Technical Committee Information Security Management Handbook, Sixth Edition Harold F. **Advanced Technology for Digital Libraries** Panos Constantopoulos, Ingeborg T. Solvberg, 2003-06-30 Digital libraries DLs are major advances in information technology that frequently fall short of expectations 7 28 Covi Kling 7 argue that understanding the wider context of technology use is essential to understanding digital library use and its plementation in different social worlds Recent health informatics research also gues that social and organisational factors can determine the success or failure of healthcare IT developments 8 11 12 Heathfield 11 suggests that this is due to the complex autonomous nature of the medical discipline and the specialized clinician or software engineer approach to system development Negative reactions to these systems is often due to inappropriate system design and poor implementation H ever there may be other less obvious social and political repercussions of information system design and deployment Symon et al 26 have identified within a hospital scenario how social structures and work practices can be disrupted by technology implementation Although these systems often deal with sensitive personal infor tion other system design research has found that apparently innocuous data can be perceived as a threat to social and political stability 1 2 3 To understand the impact of DLs within the medical profession an in depth evaluation is required of the int duction and later development of these applications within their specific social and organisational settings However as Covi Kling 7 have highlighted there are few high level theories that aid designers in understanding the implication of these issues for DL design and implementation      Logic and the Foundations
