culture has an impact on a company's success. Additionally, this thesis aims to develop a questionnaire that will examine the validity of the framework and serve as a basis for the field study. The focus is on very small manufacturers. First breakthroughs in quality management have been taken place in this industry. Thus we can dispose of more than 100 years of research results in this field. Furthermore, it is the manufacturer who is used to the first movers role in new quality management models. Another good reason for choosing this industry.
