The Public Administration Workbook Dennis L. Dresang, 2016-08-05 Public administration is a craft that demands real world application of concepts and theories often learned in a classroom. Yet many students find it difficult to make the leap from theory to practice completely unaided. The Public Administration Workbook 8e is specifically designed with the theoretically grounded practice minded student in mind. It reviews scholarship in political science, law, industrial psychology, and the sociology of organizations and then allows students to see how these intellectual fields inform the analytical and managerial tasks that comprise public administration. Where standard public administration textbooks examine the nature of public agencies and explain how bureaucracies relate to other institutions, this workbook promotes a more effective way of learning by doing and more directly prepares those who will pursue careers in public agencies. Each chapter begins with a discussion of relevant concepts and scholarship before moving into a hands on exercise analyzing core analytical and management challenges. This edition includes an all new exercise on contract negotiation, many international examples interwoven throughout the book and a fully updated HRM section to reflect alternative ranking and compensation systems. Each chapter is further supported by a detailed Instructor's Manual written by the author to guide instructors on solutions, explanations and ideas for using or modifying the exercises to fit a variety of course needs as well as downloadable datasets and exercises providing students with a unique opportunity to apply and test classroom concepts outside of the job.

Making a Difference Peter Hernon,Nancy Rossiter,2006-12-30 Leadership is separate from but integral to management and library directors today and for the foreseeable future can be expected to play an institutional role as they lead the library to contribute towards the mission of their college and university. Similarly new courses in library leadership now accompany more traditional ones on managing organizations and information resources. However much of the literature on LIS leadership represents a distilled application of principles and practices borrowed from other disciplines with few reports of research from the library field. Conceived as a companion to *The Next Library Leadership* Libraries Unlimited 2003 *Making a Difference* includes not only a discussion of effective attributes but of issues central to the development of leadership qualities, strategies and dispositions. Essential reading for anyone interested in advancing the quality of leadership within LIS particularly academic librarians in or aspiring to positions of managerial leadership.
