as CNNs RNNs and more using TensorFlow

Book Description Deep learning is one of the most popular domains in the AI space allowing you to develop multi layered models of varying complexities This book introduces you to popular deep learning algorithms from basic to advanced and shows you how to implement them from scratch using TensorFlow Throughout the book you will gain insights into each algorithm the mathematical principles behind it and how to implement it in the best possible manner The book starts by explaining how you can build your own neural networks followed by introducing you to TensorFlow the powerful Python based library for machine learning and deep learning Moving on you will get up to speed with gradient descent variants such as NAG AMSGrad AdaDelta Adam and Nadam The book will then provide you with insights into RNNs and LSTM and how to generate song lyrics with RNN Next you will master the math for convolutional and capsule networks widely used for image recognition tasks Then you learn how machines understand the semantics of words and documents using CBOW skip gram and PV DM Afterward you will explore various GANs including InfoGAN and LSGAN and autoencoders such as contractive autoencoders and VAE By the end of this book you will be equipped with all the skills you need to implement deep learning in your own projects

What you will learn Implement basic to advanced deep learning algorithms Master the mathematics behind deep learning algorithms Become familiar with gradient descent and its variants such as AMSGrad AdaDelta Adam and Nadam Implement recurrent networks such as RNN LSTM GRU and seq2seq models Understand how machines interpret images using CNN and capsule networks Implement different types of generative adversarial network such as CGAN CycleGAN and StackGAN Explore various types of autoencoder such as Sparse autoencoders DAE CAE and VAE

Who this book is for If you are a machine learning engineer data scientist AI developer or simply want to focus on neural networks and deep learning this book is for you Those who are completely new to deep learning but have some experience in machine learning and Python programming will also find the book very helpful
