Citing an entire website

When you refer to a website in your text without [quoting](#) or [paraphrasing](#) from a specific part of it, you don't need a formal citation. Instead, you can just include the URL in parentheses after the name of the site:

One of the most popular social media sites, Instagram (<http://instagram.com>), allows users to share images and videos.

For this kind of citation, you don't need to include the website on the [reference page](#). However, if you're citing a specific page or article from a website, you will need a formal [in-text citation](#) and reference list entry.
