Proactive Human-Robot Collaboration Toward Human-Centric Smart Manufacturing Shufei Li, Pai Zheng, Lihui Wang, 2024-05-15 Proactive Human Robot Collaboration Toward Human Centric Smart Manufacturing is driven

by an appreciation of manufacturing scenarios where human and robotic agents can understand each other's actions and conduct mutual cognitive predictable and self-organizing teamwork. Modern factories smart manufacturing transformation and the evolution of relationships between humans and robots in manufacturing tasks set the scene for a discussion on the technical fundamentals of state of the art proactive human robot collaboration. These are further elaborated into the three main steps: i.e. mutual cognitive and empathic coworking, predictable spatio-temporal collaboration, self-organizing multiagent teamwork to achieve an advanced form of symbiotic HRC with high level dynamic reasoning teamwork skills. The authors then present a deployment roadmap and several case studies providing step by step guidance for real world application of these ground breaking methods which crucially contribute to the maturing of human centric sustainable and resilient production systems. The volume proves to be an invaluable resource that supports understanding and learning for users ranging from upper undergraduate graduate students and academic researchers to engineering professionals in a variety of industry contexts. Offers pioneering information on an industry 5.0 topic that has attracted much research interest in recent years. Takes advantage of a structured and comprehensive approach to seamlessly combine theory latest technological developments and their practical applications. Includes actionable methods while conceptualizing future implications for smart manufacturing.
