Slope

Student Edition
Pages 400-404

Find the slope of each line.

Determine the slope of each line named below.

4) a $-\frac{3}{1}$

5) b $\frac{3}{2}$

6) c 0

7) d $-\frac{2}{5}$

8) e $\frac{3}{1}$

9) f $-\frac{3}{2} = -1$

10) g $\frac{1}{5}$

11) h $-\frac{4}{1}$

12) i $\frac{1}{0} = \text{und.}$

Find the slope of the line that contains each pair of points.

13. E(2, 1), F(4, 3)

14. J(-1, 4), K(-4, 8)

15. A(3, 4), B(-2, 4)

16. M(0, -3), N(4, 6)

17. P(6, -3), R(8, -2)

18. K(-3, -2), W(10, 5)

19. H(-2, 3), T(-4, -1)

20. Y($\frac{1}{2}$, 3), Z($\frac{1}{2}$, -2)

21. P(0, 1.25), L(0.5, 0)

$$m = \frac{3 - (-1)}{-2 - (-4)} = \frac{4}{2} = 2$$

$$m = \frac{3 - (-2)}{\frac{1}{2} - \frac{1}{2}} = \frac{5}{0} = \text{und.}$$

$$m = \frac{1.25 - 0}{0 - 0.5} = \frac{1.25}{-0.5} = -2.5$$

Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 8 Jo Boaler, Jen Munson, Cathy Williams, 2020-01-29 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts In this volume you ll find a collection of low floor high ceiling tasks that will help you do just that by looking at the big ideas at the eighth grade level through visualization play and investigation During their work with tens of thousands of teachers authors Jo Boaler Jen Munson and Cathy Williams heard the same message that they want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach So the authors designed Mindset Mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning Open creative and visual math tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential The tasks in Mindset Mathematics reflect the lessons from brain science that There is no such thing as a math person anyone can learn mathematics to high levels Mistakes struggle and challenge are the most important times for brain growth Speed is unimportant in mathematics Mathematics is a visual and beautiful subject and our brains want to think visually about mathematics With engaging questions open ended tasks and four color visuals that will help kids get excited about mathematics Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards CCSS and can be used with any current curriculum

Teaching and Learning High School Mathematics Charlene E.

Beckmann, Denise R. Thompson, Rheta N. Rubenstein, 2009-11-02

Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics. When students curtail their course taking in mathematics they may be impacting their college and career options. Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students. Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i.e. teaching strategies but they also need to know how these ideas are integrated. This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know. This text is designed to provide teachers with insights into this mathematical knowledge for teaching. Teaching and Learning High School Mathematics is likely different from many other texts that you have used. It integrates both content and pedagogy to help you develop and build your own understanding of teaching. The text is designed to help you develop deep conceptual understanding of fundamental mathematics. Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools. Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient. Throughout this book you are encouraged to work in cooperative teams. This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career. Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms. Lesson planning is another element pervasive throughout this text. To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1.1 and used throughout the remainder of the lessons. The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task. In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments. In Unit 4 lesson planning is formally introduced as

teachers put together elements from previous units into complete cohesive lesson plans **The Civil Engineer and Architect's Journal** ,1845 **U.S. Government Research Reports** ,1961 *Enabling Students in Mathematics* Gordon Marshall,2015-11-18 This book addresses the cognitive social and psychological dimensions that shape students mathematics experience to help students become more capable cooperative and confident in the process of engaging mathematics In these ways they can have a more valuable and enjoyable mathematics experience and become more valued participants in society The book focuses on the mathematics classroom for students grades six to twelve and how students can become more successful mathematical thinkers in addition to how the curriculum could be presented so as to provide a more engaging mathematics experience **The Engineer** ,1883 The Civil Engineer and Architect's Journal William Laxton,1859
