#### Nucleic Acids Irshad Ul Haq Bhat,Zakia Khanam,2023-08-20 Nucleic Acids A Natural Target for Newly

Designed Metal Chelate Based Drugs discusses how human diseases are becoming more costly to treat along with updates on the resistance offered by disease causing agents The abundance of drugs in the market has provided great relief to patients but side effects can destroy the immune system of the body Patients need to boost their immune system and at the same time cover expenses incurred to cure disease Thus a paradigm shift is needed to design a drug molecule with low cost and easy

availability Metal complexes can be a great example of such a shift as metal ions are components of biological molecules and can achieve good binding capability to specific targets while not allowing them to damage healthy cell system Therefore in this book a comprehensive compilation of recent data is provided including the structural elucidation of metal complexes by advanced techniques and the binding pattern of metal complexes with specific targets Focuses on recent advances and methods adopted for generating new metal based molecules and their interactions with biomolecules especially nucleic acids Addresses challenges for developing new metal based drugs Examines advances in optical techniques for the characterization of metal based drugs      **Anthrozoology** Geoff Hosey,Vicky Melfi,2018-11-30 Anthrozoology the study of human animal interactions HAIs has experienced substantial growth during the past 20 years and it is now timely to synthesise what we know from empirical evidence about our relationships with both domesticated and wild animals Two principal points of focus have become apparent in much of this research One is the realisation that the strength of these attachments not only has emotional benefits for people but confers health benefits as well such that a whole area has opened up of using companion animals for therapeutic purposes The other is the recognition that the interactions we have with animals have consequences for their welfare too and thus impact on their quality of life Consequently we now study HAIs in all scenarios in which animals come into contact with humans whether as pets companions farm livestock laboratory animals animals in zoos or in the wild This topical area of study is of growing importance for animals in animal management animal handling animal welfare and applied ethology courses and also for people within psychology anthropology and human geography at both the undergraduate and postgraduate level It will therefore be of interest to students researchers and animal managers across the whole spectrum of human animal contact      *Cell Biology and Translational Medicine, Volume 20* Kursad Turksen,2023-08-24 Much research has focused on the basic cellular and molecular biological aspects of stem cells Much of this research has been fueled by their potential for use in regenerative medicine applications which has in turn spurred growing numbers of translational and clinical studies However more work is needed if the potential is to be realized for improvement of the lives and well being of patients with numerous diseases and conditions This book series Cell Biology and Translational Medicine CBTMED as part of Springer Nature s longstanding and very successful Advances in Experimental Medicine and Biology book series has the goal to accelerate advances by timely information exchange Emerging areas of regenerative medicine and translational aspects of stem cells are covered in each volume Outstanding researchers are recruited to highlight developments and remaining challenges in both the basic research and clinical arenas This current book is the 20th volume of a continuing series      **Therapeutic Proteins and Peptides** ,2018-04-18 Therapeutic Proteins and Peptides Volume 112 in an ongoing series promotes further research in the discovery of new therapeutic targets that can be affected by therapeutic proteins and peptides to cure or manage symptoms of human diseases with this release focusing on the Rational Design of Stable Liquid Formulations of Biopharmaceuticals Formulation strategies
