Culture and Economy in the Age of Social Media Christian Fuchs,2015-01-09 Understanding social media requires us to engage with the individual and collective meanings that diverse stakeholders and participants give to platforms It also requires us to analyse how social media companies try to make profits how and which labour creates this profit who creates social media ideologies and the conditions under which such ideologies emerge In short understanding social media means coming to grips with the relationship between culture and the economy In this thorough study Christian Fuchs one of the leading analysts of the Internet and social media delves deeply into the subject by applying the approach of cultural materialism to social media offering readers theoretical concepts contemporary examples and proposed opportunities for political intervention *Culture and Economy in the Age of Social Media* is the ultimate resource for anyone who wants to understand culture and the economy in an era populated by social media platforms such as Twitter Facebook and Google in the West and Weibo Renren and Baidu in the East Updating the analysis of thinkers such as Raymond Williams Karl Marx Ferruccio Rossi Landi and Dallas W Smythe for the 21st century Fuchs presents a version of Marxist cultural theory and cultural materialism that allows us to critically understand social media s influence on culture and the economy

Governance of the Global and Extra-Terrestrial Commons Michael Roe,2023-06-26 This book provides a unique analysis of the complex relationship between governance and the global commons It has a specific reference to the dynamic and growing outer space economy and society and how experience in the maritime sector which exhibits many of the same issues and challenges as outer space can be useful in suggesting moves forward in policy making and design This book fills a large gap in the literature of both governance and the development of outer space Whilst the maritime sector has a long history of debate albeit little in terms

of governance and policy making outer space has much less and what there has been commonly focused upon technical considerations The importance of this book is that the failures of maritime governance need to be avoided in the outer space sector which exhibits many of the same issues particularly those related to the global commons Innovative and exciting this book will be of interest to academics studying corporate governance business management and space capitalism *Full and Productive Employment in Developing Economies* Rizwanul Islam,2019-07-30 The United Nations Sustainable Development Goals include a specific target for full and productive employment However what constitutes full employment in developing countries is not yet clearly understood And likewise there is no clear direction for developing strategies and policies to address this challenge Drawing on the author's deep knowledge of employment and inclusive development this book presents a broad framework which could enable us to pursue the challenging goal of full productive employment in developing countries It revisits the conceptual foundations of full employment and carefully examines the issue of suitable indicators for monitoring progress It also examines the challenges created by globalized production chains and labour market fluctuations caused by economic crises This book throws light on a major lacuna in development thinking on how the challenge of creating productive employment for all in developing countries needs to be addressed It provides a solution by re-examining relevant theories and empirical evidence and by bringing out their implications for development strategies and policies Finally the focus falls on the effective implementation of employment strategies and policies This authoritative work will appeal to a diverse readership of academic researchers think tanks international organizations and development partners

Reading Marx in the Information Age Christian Fuchs,2015-10-23 Renowned Marxist scholar and critical media theorist Christian Fuchs provides a thorough chapter by chapter introduction to Capital Volume 1 that assists readers in making sense of Karl Marx's most important and groundbreaking work in the information age exploring Marx's key concepts through the lens of media and communication studies via contemporary phenomena like the Internet digital labour social media the media industries and digital class struggles Through a range of international current day examples Fuchs emphasises the continued importance of Marx and his work in a time when transnational media companies like Amazon Google and Facebook play an increasingly important role in global capitalism Discussion questions and exercises at the end of each chapter help readers to further apply Marx's work to a modern day context *Materialities of Age and Ageing: Concepts of a Material Gerontology* Grit Höppner,Monika Urban,2019-06-18 In gerontological research the understanding of age and ageing changed in the last decade Biologic determined explanations no longer prevail in this research field Instead ideas of social constructivism are frequently used These ideas define the state of age and the process of ageing as social constructions steeping ageing in social and cultural assumptions ascriptions and expectations From a social constructivist perspective age and ageing are not just identified as dependency deficit and need for care as it was foremost accelerated from a biological perspective but with the life course and thus with individual lifestyles experiences attitudes and practices as

well as institutional and economic structures A prominent social constructivist concept is doing age Similar to doing gender the concept of doing age assumes age as taking place in the form of a social praxis within everyday life interactions between people and thus in performances embedded in discourses through which social hierarchies and ideals proceed Despite the paradigm shift that social constructivist concepts enable in gerontological thinking they reveal their blind spot when it comes to the materiality of ageing and thus to fleshy sensual experiences human and non human ontologies and agencies Addressing these materialities of ageing brings up its own critique on definitions of ageing bodies and material environments This framing does not presume that age and ageing are solely products of human to human interactions or those of formative environments or of discourses Rather humans non humans and discourses become essential parts of ageing processes Such a material framing enables us new insights into forms of age and ageing and thus offers an opportunity for scholars to engage critically with materialities of age and ageing This eBook explores theoretical methodological and empirical concepts of such a Material Gerontology [Economics](#), 2015 The 2014 HSC workbooks provide students with real samples of students exam responses complete with markers comments Each workbook contains the actual 2014 HSC exam questions the guidelines provided to exam markers samples of top scoring student responses specific markers comments on student responses

How the other half lives Samuel Burgum, Katie Higgins, 2022-03-22 We are all of us intimately familiar with inequalities Whether finding somewhere to live walking in the street following the news negotiating international travel or in our working and personal lives subtle and crude hierarchies shape our lived experience How the other half lives contributes detailed multidisciplinary and qualitative explorations of the everyday social and spatial realities of inequality drawing new lines from Manchester to Milan from Brighton to Bologna Uniquely structured as a series of oppositions between peaks and troughs with each chapter focusing on a specific subject including housing urban design place making the state cultures of inequality and transnational mobility This book is a resource to navigate an unequal world oriented around three key understandings of inequality as contingent intersectional and interrelated This book is relevant to United Nations Sustainable Development Goal 10 Reduced inequalities [Global Imperialism and the Great Crisis](#) Ernesto Screpanti, 2014-06-16 In this provocative study economist Ernesto Screpanti argues that imperialism far from disappearing or mutating into a benign globalization has in fact entered a new phase which he terms global imperialism This is a phase defined by multinational firms cut loose from the nation state framework and free to chase profits over the entire surface of the globe No longer dependent on nation states for building a political consensus that accommodates capital accumulation these firms seek to bend governments to their will and destroy barriers to the free movement of capital And while military force continues to play an important role in imperial strategy it is the discipline of the global market that keeps workers in check by pitting them against each other no matter what their national origin This is a world in which the so called labor aristocracies of the rich nations are demolished the power of states to enforce checks on capital is sapped and global firms are free to pursue their monomaniacal quest for

profits unfettered by national allegiance Screpanti delves into the inner workings of global imperialism explaining how it is different from past forms of imperialism how the global distribution of wages is changing and why multinational firms have strained to break free of national markets He sees global imperialism as a developing process one with no certain outcome But one thing is clear when economic crises become opportunities to discipline workers and when economic policies are imposed through increasingly authoritarian measures the vision of a democratic and humane world is what is ultimately at stake

In the Event of Women Tani Barlow, 2021-09-20 In the Event of Women outlines the stakes of what Tani Barlow calls the event of women Focusing on the era of the late nineteenth century through the mid twentieth century s Cultural Revolution Barlow shows that an event is a politically inspired action to install a newly discovered truth in this case the mammal origins of human social evolution Highbrow and lowbrow social theory circulating in Chinese urban print media placed humanity s origin story in relation to commercial capital s modern advertising industry and the conclusion that women s liberation involved selling buying and advertising industrial commodities The political struggle over how the truth of women in China would be performed and understood Barlow shows means in part that an event of women was likely global because its truth is vested in biology and physiology In so doing she reveals the ways in which historical universals are effected in places where truth claims are not usually sought This book reconsiders Alain Badiou s concept of the event particularly the question of whose political moment marks newly discovered truths

Transitions to Post-School Life Margarita Pavlova, John Chi-Kin Lee, Rupert Maclean, 2017-11-16 This book addresses growing reservations about the relevance of educational systems to the economic and social needs of individuals by examining different aspects of transitions from school to work or further studies within formal and informal settings in Asia Highlighting important issues such as selectiveness and inclusiveness integration of transversal competencies vocationalisation of secondary schooling approaches to career guidance and emerging models of student support it is of particular interest to educators policymakers and other stakeholders who are concerned about the effectiveness of system wide and institutional based approaches The first part of the book explores different models mechanisms and approaches to policy and practice in the context of Asia while the second part examines Hong Kong students transitions to post school life and provides an account of issues and challenges the government and individual schools experience in terms of structural support for both mainstream and special needs students
