Chapter 3: *i*LEAP Science, Grade 7

This section describes the overall design of the *i*LEAP Science test to be administered to students in grade 7. Test specifications and sample test questions are provided so that teachers may align classroom practices with the state assessment.

Test Structure

The Science test consists of one part and is administered in a single day.

The Science test is a criterion-referenced test (CRT) that includes items based entirely on Louisiana's science content standards. These items are aligned with Louisiana's Grade-Level Expectations (GLEs) and were developed specifically for Louisiana.

Item Types

The test has forty-eight (48) multiple-choice items.

The multiple-choice items consist of an interrogatory stem and four answer options. These items assess a student's knowledge and conceptual understanding, and responses will be scored 1 if correct and 0 if incorrect.

To maximize the meaningfulness of multiple-choice test items, questions are typically cast in a practical problem-solving context, referring to a single stimulus (e.g., chart) or to a description of a single scenario. The reading difficulty level of test questions is minimized to the extent possible (except for necessary scientific terms) so that students' reading ability does not interfere with their ability to demonstrate their science knowledge and skills.

Description of the Science Test

The Science test was developed specifically for Louisiana. Committees of Louisiana educators reviewed all items for content and alignment with Louisiana's standards, benchmarks, and GLEs. Separate committees reviewed the items for potential bias and sensitive material.

The Science test is **untimed.** About one hour (60 minutes) is the suggested time to allow students to answer the questions.

The grade 7 Science test assesses three of the five science strands delineated in the Louisiana Science Framework and the Comprehensive Curriculum: Science as Inquiry, Life Science, and Science and the Environment.
