

## **Commercial Valuations**

The type of commercial valuation system used is determined by each individual customer. At the current time we use three different commercial valuation systems. There is no fee for any of the valuations as they are considered a part of the standard fee for the main line of coverage requested. Most of our coverages require a valuation to be completed on any building that is owned, has coverage carried by the insured, or when the customer requests it specifically.

The available valuation systems are as follows:

### **BVSC**

- The BVSC is our default valuation system.
- Building Valuation System Commercial (BVSC) is the commercial valuation system for Marshall/Swift/Boeckh.

### **QCE**

- Quick Commercial Estimator (QCE) is the commercial valuation system from E2Value.
- This system is designed for standard commercial operations.
- At the current time, we do not have a GISA form for the QCE. If a QCE is requested, please add and complete the BVSC.

### **E2FR**

- Farm & Ranch Estimator (E2FR) is the farm outbuilding valuation system from E2Value.
- This system is designed for commercial farming and hobby farming operations.
- At the current time, we do not have a GISA form for the E2FR. If an E2FR is requested, please add and complete the BVSC.
