 develop a general purpose multibody system software package This concept provides the opportunity to use a modular
 structure of the software i e different multibody formalisms may be combined with different simulation programmes via
 standardized interfaces For the DFG project the database RSYST was chosen using standard FORTRAN 77 and an object
 oriented multibody system datamodel was defined The project included research on the fundamentals of the method of
 multibody systems concepts for new formalisms of dynamical analysis development of efficient numerical algorithms and
 realization of a powerful software package of multibody systems These goals required an interdisciplinary cooperation
 between mathematics computer science mechanics and control theory ix X After a rigorous reviewing process the following
