Iyberg and Janis Bubenko In all these years modern businesses and IT systems have been facing an ever more complex environment characterized by openness variety and change Furthermore enterprises are experiencing ever more variety in their business in many dimensions In the same way the explosion of information technologies is overwhelming with a multitude of languages platforms devices standards and products Thus enterprises need to manage an environment to monitor the interplay of changes in the business processes in information technologies and at the ontological level in order to achieve a sustainable development of their information systems Enterprises must enter the era of sustainable information systems to face the important developmental challenges During all these years CAiSE researchers have been challenged by all these changes and the CAiSE conferences provide a forum for presenting and debating important scientific results In fact CAiSE is positioned at the core of these tumultuous processes hosting new emerging ideas fostering innovative processes of design and evaluation developing new information technologies adapted to information systems creating new kinds of models but always being subject to rigorous scientific selection Highly Skilled Labor Migration Ulaş Sunata, 2011 Highly Skilled Labor Migration has been mostly explained by reduction to economy The significance of both determination of political economy on HSLM and its impact on the economy cannot be ignored But this one-sidedness in migration studies leads to some blind spots by keeping the migrant and her/his experience out of the center of sociological accounts This work aimed at understanding socio-structural grounds and influences of HSLM experience by

introducing its elite migrants as homo migrant sociologicus rather than homo migrant economicus It particularly presents an integrated analysis about ICT specialists from Turkey in Germany **The infallible key to French pronunciation, or, The French student's vade-mecum** J.
