Configurations of Interdisciplinarity Within Education Trine Øland, Sofie Sauzet, Marie Larsen Ryberg, Katrine Lindvig, 2022-08-26 This book explores how everyday life within educational institutions changes in response to ideas of interdisciplinarity at policy level It provides new insights into different configurations of interdisciplinarity which traverses all levels of the Danish educational system Offering a novel perspective to interdisciplinarity in terms of its configurations the book discusses the Danish educational system and its current transformations showing how progressive ideas are entangled with new forms of accountability and complex responsibilities It identifies the concrete challenges that interdisciplinarity is expected to solve and the organizational changes resulting from the solutions introduced arguing that interdisciplinarity in education is neither a uniform or consistent process nor are the kinds of disciplining it may yield This book will appeal to academics researchers and post graduate students in the fields of interdisciplinary education pedagogy comparative education and northern European educational and welfare systems

Sex, Rett Og Reformasjon Anne Irene Riisøy, 2009 Based on legislation and legal practice from the period c 1250 1600 the book takes issue with the most important viewpoints in earlier research by early modernists that the Reformation represented a watershed in a development characterized by greater criminalisation of sexual acts increase in the severity of sentences and deterioration of the position of women According to this study in principle all or mostly all factors were already in place in the Middle Ages In Norwegian historiography the period investigated is characterized by paucity of sources and the period has tended to fall between two stools respectively the medievalist and the early modernist The ambition of this book has been to bridge the gap

Hunters in Transition Lars Ivar Hansen, Bjørnar Olsen, 2013-10-31 *Hunters in Transition* provides a new outline of the early history of the Sami the indigenous population of northernmost Europe Discussing crucial issues such as the formation of Sami ethnicity interaction with chieftain and state societies and the transition from hunting to reindeer herding the book departs from the common trope whereby native encounters with other cultures state societies and modernity are depicted mainly in negative terms Far from always victimizing the other the interaction with outside societies played a crucial role in generating and maintaining a number of features considered integral to Sami culture At the same time the authors also emphasize internal processes and dynamics and show how these have greatly contributed to the diverse historical trajectories with which this book is concerned Listed by Choice magazine as one of the Outstanding Academic Titles of 2014
