Ks1 2007 Mental Maths Questions:

The Cambridge Primary Review Research Surveys Robin Alexander, Christine Doddington, John Gray, Linda Hargreaves, Ruth Kershner, 2012-08-06 The Cambridge Primary Review Research Surveys is the outcome of the Cambridge Primary Review England's biggest enquiry into primary education for over forty years. Fully independent of government, it was launched in 2006 to investigate the condition and future of primary education at a time of change and uncertainty and after two decades of almost uninterrupted reform. Ranging over ten broad themes and drawing on a vast array of evidence, the Review published thirty-one interim reports including twenty-eight surveys of published research provoking media headlines and public debate before presenting its final report and recommendations. This book brings together the twenty-eight research surveys specially commissioned from sixty-five leading academics in the areas under scrutiny and now revised and updated to create what is probably the most comprehensive overview and evaluation of research in primary education yet published. A particular feature is the prominence given to international and comparative perspectives. With an introduction from Robin Alexander, the Review's director, the book is divided into eight sections covering children's lives and voices, school, home and community, children's development, learning, diversity and needs, aims, values and contexts for primary education, the structure and content of primary education, outcomes, standards and assessment in primary education, teaching in primary schools, structures and processes, teaching in primary schools, training, development and workforce, reform, policy, frameworks, governance, funding, reform and quality assurance. The Cambridge Primary Review Research Surveys is an essential reference tool for professionals, researchers, students and policy makers working in the fields of early years, primary and secondary education. *The Parliamentary Debates (Hansard)*.
