Bringing the English Curriculum to Life David Didau, 2024-04-12 *Bringing the English Curriculum to Life* builds on David Didau's groundbreaking book *Making Meaning in English* by showing how the principles of the original book can be applied in schools and classrooms. Drawing together experiences of designing, teaching, supporting and assessing English across the schools within Ormiston Academies Trust OAT, this book demonstrates what an ambitious, coherently sequenced, broad and balanced English curriculum with successful adaptation for students with SEND can look like in practice. Designed around the explicit teaching of the powerful conceptual knowledge students need to master the discipline, the book offers a fully resourced English curriculum packed with teaching suggestions and examples of high quality practice. Covering intent, implementation and assessment, and outlining in detail what is included in each module for KS3 and 4, the curriculum can be adopted in its entirety but is also flexible enough for departments to take modules and slot them into their own curriculum. Providing an inspiring model for teaching English that enables all students to succeed, this is an essential resource for all English teachers and school leaders responsible for curriculum development. Teaching Bilingual and EAL Learners in Primary Schools Jean Conteh, 2012-07-31 Shortlisted for the UKLA Academic Book Award 2013. As the number of children learning EAL in primary schools increases, trainee teachers need to develop the professional skills and expertise to teach them. This text reconsiders which children should come under the umbrella of EAL and provides practical strategies for teaching them in an inclusive classroom. It asks what we mean by EAL and covers essential theories of learning and approaches to teaching. Chapter topics include speaking and listening, and reading and writing, and activities and case studies to link theory to practice are provided throughout. About the Transforming Primary QTS Series. This series reflects the new creative way schools are beginning to teach, taking a fresh approach to supporting trainees as they work towards primary QTS. Titles provide fully up to date resources focused on teaching a more integrated and inclusive curriculum, and texts draw out meaningful and explicit cross-curricular links. *Challenging the Qualitative-Quantitative Divide* Barry Cooper, Judith Glaesser, Roger Gomm, Martyn Hammersley, 2012-03-08. This book challenges the divide between qualitative and quantitative approaches that is now institutionalized within social science. Rather than suggesting the mixing of methods, *Challenging the Qualitative Quantitative Divide* provides a thorough interrogation of the arguments and practices characteristic of both sides of the divide, focusing on how well they address the common problems that all social research faces, particularly as regards causal analysis. The authors identify some fundamental weaknesses in both quantitative and qualitative approaches and explore whether case-focused analysis, for instance in the form of Qualitative Comparative Analysis, Analytic Induction, Grounded Theorising or Cluster Analysis, can bridge the gap between the two sides. The Times Index, 2010. Indexes the Times, Sunday Times and magazine Times, literary supplement, Times educational supplement, Times educational supplement, Scotland and the Times higher education supplement. *Knowledge, Values and Educational Policy* Harry Daniels, Hugh

Lauder, Jill Porter, 2012-07-26 Knowledge Values and Educational Policy focuses on what schools are for and what should be taught in them how learning is possible across boundaries and issues of diversity and equity Policies and practices relating to schools are also considered Within this volume internationally renowned contributors address a number of fundamental questions designed to take the reader to the heart of current debates around curriculum knowledge transfer equity and social justice and system reform such as What are schools and what are they for What knowledge should schools teach How are learners different from each other and how are groups of learners different from one another in terms of social class gender ethnicity and disability What influence does educational policy have on improving schools What influence does research have on our understanding of education and schooling To encourage reflection many of the chapters also include questions for debate and a guide to further reading Read alongside its companion volume Educational Theories Cultures and Learning readers will be encouraged to consider and think about on some of the key issues facing education and educationists today

Errors and Misconceptions in Maths at Key Stage 2 Mike Spooner, 2012-07-26 The activities in this book are designed both to help children to learn and to understand math concepts and also to prepare them for taking SATS papers at KS2 There is plenty of research evidence to suggest that children are helped in their understanding of math problems if teachers focus on common misconceptions and if children are given opportunities for discussion and explanation of their own understanding Children can also feel stigmatized by being made to focus on their own errors Mike Spooner has developed activities that present already completed work which children then assess correct and discuss in this way they can

analyze mistakes without damage to their own self esteem The activities are presented in the same format as the SATS papers to give children practice in coping with that format The book also contains writing frames that children can use to structure their discussions of math problems KS2 Mathematics BBC Worldwide,2000-01 This pack of actual examination papers from 1999 is designed to assist school students in preparing for their national tests It offers support and guidance both for students and parents and gives a clear explanation of the marking schemes **SATs KS1 Year 2 Maths Practice Papers 1 and 2 (Mock Tests A-D) Book 2** A.
