

## General

Alpha, Beta automatic transaxle is installed on the vehicles that have alpha or beta engine. Therefore this transaxle is for small sized compact vehicles such as Getz, Accent and so on. It was developed and modified from the 'KM series' of Japan so the basic control system and mechanical structure is not so different between alpha and beta automatic transaxle.

Alpha and Beta automatic transaxle has a same mechanical structure and hydraulic, electronic control system. Just the maximum input torque for automatic transaxle is different because the alpha and beta engine have a different engine torque and power. In this training CD, only for the advanced alpha automatic transaxle will be explained as the model is applied on the vehicle currently.

The first old alpha automatic transaxle was installed on the 'Hyundai Scoupe' which was named 'SLC(Sports Looking Car)' and the model code was 'A4AF1'. Refer the following rule to understand the meaning of that code.

- A4AF1,2,3:  
A: Automatic transaxle, 4: 4speed, A: Alpha, 1: Developing order
- A4BF1,2:  
A: Automatic transaxle, 4: 4speed, B: Beta, 1: Developing order

The advanced alpha automatic transaxle (A4AF3) and advanced beta automatic transaxle (A4BF2) was applied on the Hyundai Accent and Coupe since 1999.

Alpha, Beta AT
