Meade Lx90 User Guide:

A User's Guide to the Meade LXD55 and LXD75 Telescopes Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope

The Urban Astronomer's Guide Rod Mollise, 2006-12-22 Most amateur astronomers yearn to observe more frequently Many of them however live in urban and highly developed suburban areas that are heavily light polluted Due to this light pollution they are under the impression that deep sky objects nebulae galaxies star clusters are either invisible or not worth viewing from home This book describes the many objects that can be seen in a bright urban sky and shows the city or suburban astronomer how to observe object after object season after season This book covers the why how and what of astronomy under light polluted skies The prospective city based observer is told why to observe from home there are hundreds of spectacular objects to be seen from the average urban site how to observe the city sky telescopes accessories and modern techniques and what to observe About 50% of the book is devoted to describing tours of the sky with physical and observational descriptions at the eyepiece drawings and photographs

Choosing and Using a New CAT Rod Mollise, 2020-05-22 Catadioptric telescopes CATs such as the Schmidt Cassegrains remain popular among amateur astronomers for their ability to reveal thousands of beautiful deep space wonders Additionally their computer assisted capabilities allow them to automatically point to and track celestial objects making astronomy accessible to more people than ever before However selecting the right one and learning how to use it can be difficult for stargazers both old and new That's where this book comes in The first edition published in 2009 has remained the standard reference for mastering these popular instruments This revised edition brings the material completely up to date with several extensively rewritten chapters covering the most recent developments in telescope and camera equipment as well as computer software Through the author's 45 years of experience with catadioptric telescopes readers will learn to decide which catadioptric telescope is right for them to choose a specific make and model and finally to use the telescope in the field Covered in other chapters are Solar System and deep sky observations astrophotography and computer control of
