5 pages | 1007 words

As a freshman in high school, getting used to everything that is new is quite difficult. Taking everything in and trying to handle many things at once is a struggle, even though college might seem far away, but in reality, it is only 4 years away. Trust me, there are more urgent things to worry over than college, but you always have to make sure you are always working up to what you want to be in college. Before, when people asked me what I want to be, I had no idea, so the Naviance test helped me immensely. Now, since I know what I like and dislike for my future careers, I now know that I want to be a counseling psychologist. I want to become a counseling psychologist because of the requirements for the job, the responsibilities, and the overall employment outlook. As of 10 years today, I will hopefully have finished regular college and currently be in medical school, I will hopefully become fully licensed when I am 30-34 if I pursue all of my years in the beginning. In order to become a licensed counseling psychologist, you need many requirements. First you need to earn a bachelor degree in psychology which takes about 3 to 4 years, then if you want a doctorate level degree you need 4 to 7 years of graduate school. In order for you to get a license, people usually spend eight to twelve years in order to become a fully licensed psychologist. During the college fair, I visited Miami University, Xavier, and The University of Cincinnati and I had asked if their psychology program is up to other colleges standards, and I was very surprised of all their answers. They all told me that psychology was one of their top programs of all the schools I visited. After I visited the colleges, I looked at their pamphlets, and was relieved that their information was very accurate from what they told me. So far as a freshman I am unable to do anything to help my future career, but the thing that surprised me the most was the amount of universities around me that had such amazing psychology programs. Even though there are many requirements for this field of work, it will eventually pay off and I am willingly to do whatever it takes. The responsibilities of becoming a counseling psychologist is a lot to handle as a freshman, especially since right now I can't help ease the process. Some responsibilities of being a counseling psychologist requires you to include and collect information through observations, interviews, and different types of methods. Another responsibility they have, is to use what they know to understand the individual or group to help them to the best of their abilities. The most difficult responsibility I have learned is making sure you are always up to date with new psychological studies, so you are making sure your patient is receiving the best treatment and care. A responsibility that surprises me is that you work alongside with many other professions such as nurses, teachers, or even clinical doctors....

Since the late 1960s films from Latin America have won widening audiences in North America and Europe. Until now no single book has offered an introduction to the diverse personalities and practices that make up this important regional film movement. In *Cinema and Social Change in Latin America*, Julianne Burton presents twenty interviews with key figures of Latin American cinema covering three decades and ranging from Argentina to Mexico. Interviews with pioneers Fernando Birri, Nelson Pereira dos Santos, and Glauber Rocha; renowned feature filmmakers Tomás Gutiérrez Alea and Carlos Diegues; prize-winning documentarists Patricio Guzmán and Helena Solberg; Ladd among others endeavor to balance personal achievement against the backdrop of historical, political, social, and economic circumstances that have influenced each director's career. Presented also are conversations that cast light on the related activities of acting, distribution, theory, criticism, and film-based community organizing. More than their counterparts in other regions of the world, Latin American artists and intellectuals acknowledge the degree to which culture is shaped by history and politics. Since the mid 1950s, a period of rising nationalism and regional consciousness, talented young artists and activists have sought to redefine the uses of the film medium in the Latin American context. Questioning the studio and star systems of the Hollywood industrial model, these innovators have developed new forms, content, and processes of production, distribution, and reception. The specific approaches and priorities of the New Latin American Cinema are far from monolithic. They vary from realism to expressionism, from observational documentary to elaborate fictional constructs, from imperfect cinema to a cinema that emulates the high production values of the developed sectors, from self-reflexive to transparent cinematic styles, from highly industrialized modes of production to purely artisanal ones. What does not vary is the commitment to film as a vehicle for social transformation and the expression of national and regional cultural autonomy. From early alternative cinema efforts in Argentina, Brazil, and Cuba to a contemporary perspective from within the Mexican commercial industry to the emerging cinema and video production from Central America, *Cinema and Social Change in Latin America* offers the most comprehensive look at Latin American film available today.
