traders to find reasons to avoid taking trades that would have been winners Fear causes traders to exit trades before they have a chance to get the move underway and then have the misery of seeing a profitable trade run away from them There are many more destructive aspects to fear in trading and what is vital for the trader in order for them to succeed is to have a way of thinking about trading that eliminates fear from the trading process How to Stop Over Trading is the latest book in the trading psychology series of books by L R Thomas This book zeroes in on the specific reasons traders take trades outside their trading plan and offers simple solutions to stop over trading forever The truth is that if a trader consistently trades outside their strategy even on a demo platform they are very unlikely to succeed in trading If you are skewing your trading results by taking trades that you shouldn't then this book could change your trading for the better forever Patience Lack of patience also causes negative behaviors related to trading such as not bothering to back test the system not keeping careful records and not doing an end of day or end of week analysis of trading results to find areas of improvement The feeling of things not moving fast enough also causes traders to add too many trading systems to an already overloaded brain and not be able to focus properly on any one strategy to make it profitable The profitability of the trading system is profoundly impacted by these types of behaviors and turns what is a money making system in theory into a loss making system in the real life Buy the Trading Psychology Collection and Begin Improving Your Trading Today
