

The Mystery Powders Lab: Physical and Chemical Changes

Oh no! This seems to be a new substance. It must be a chemical change.

Background Information: You have learned how to describe matter based on its physical and chemical properties. You have also learned some clues that tell you whether a physical change or a chemical change is occurring. Remember a physical change involves a change in a physical property but the substance does not change its identity. When a chemical change occurs a new substance is produced. There are hints like a color change or fizzing (a gas) that indicate a chemical change has taken place because a new substance is produced.

Objective: To determine the identity of four mystery powders which are similar in appearance by *observing a physical property (solubility) and a chemical property (reactivity)*. You will also determine whether mixing these "mystery powders" with water, vinegar or iodine causes a physical or chemical change.

Weather Warfare Jerry E. Smith, 2011-08-07 In April 1997, United States Secretary of Defense William Cohen declared that there are terrorists at work who are engaging even in an eco type of terrorism whereby they can alter the climate, set off earthquakes, volcanoes, remotely through the use of electromagnetic waves. Weather modification in the form of cloud seeding to increase snow packs in the Sierras or suppress hail over Kansas is now an everyday affair. Hundreds of environmental and weather modifying technologies have been patented in the United States alone, and hundreds more are being developed in civilian, academic, military, and quasi-military laboratories around the world at this moment. This book lays bare the grim facts of who is doing it and why. The earth and the sky have themselves been turned into weapons. Underground nuclear tests in Nevada have set off earthquakes. A Russian company has been offering to sell typhoons on demand since the 1990s. Scientists have been searching for ways to move hurricanes for over 50 years, the same timeframe that took us from the Wright Brothers to Neil Armstrong. In this book, Jerry E. Smith picks up where his 1998 book about the High frequency Active Auroral Research Program (HAARP) left off. He reports on recent developments at HAARP, including its possible connection to the crash of the Space Shuttle Columbia and what role, if any, it played in certain natural disasters like Hurricane Katrina. Tackling the chemtrail controversy, Smith examines claims that particles called aerosols are being deliberately injected into the atmosphere. Edward Teller, father of the hydrogen bomb, proposed putting up a sun screen of aerosols to save the earth from global warming; is someone actually doing it? Numerous ongoing military programs do inject aerosols at high altitude for communications and surveillance operations. Could these include mind control or population control applications? Smith puts these technologies into context by examining the geopolitical conflicts that are driving their development, from Globalization to the rise of Neo-Con, Neo-Fascism.

Reports of the Chemical Laboratory of the American Medical Association. v. 4, 1911, 1911 **The Dean's Murders: a Four Corners Mystery** HP Hanson, 2001-03-31 Dean Harold Weathers has two problems. Someone killed his star chemistry professor in his laboratory, right on campus, no less, after filling his nose up with cocaine. To make matters worse, the suspect list includes Weathers' boss, Provost John Martin, and Professor Linda Harmon, chair of the chemistry department. Weathers finds a silver lining, however, when it becomes clear that Lieutenant Annette Trieri, head of the investigations unit of the Durango Police Department, seems as interested in him as he is in her. But this mutual interest is misunderstood by whoever

killed the professor because now they are trying to kill Weathers and for good measure Trieri as well Together the couple manages to stay alive while unraveling the chemistry professor s murder and uncovering a second more sinister killing to which Weathers is also connected Campus politics and drug money are a lethal combination in The Dean s Murders
