Community Translation Mustapha Taibi, Uldis Ozolins, 2016-02-25 Investigating an important field within translation studies Community Translation addresses the specific context characteristics and needs of translation in and for communities Traditional classifications in the fields of discourse and genre are of limited use to the field of translation studies as they overlook the social functions of translation Instead this book argues for a classification that cuts across traditional lines based on the social dimensions of translation and the relationships between text producers and audiences Community Translation discusses the different types of texts produced by public authorities services and individuals for communities that need to be translated into minority languages and the socio cultural issues that surround them In this way this book demonstrates the vital role that community translation plays in ensuring communication with all citizens and in the empowerment of minority language speakers by giving them access to information enabling them to participate fully in society

Code Warriors Stephen Budiansky, 2017-08-22 A sweeping in depth history of NSA whose famous cult of silence has left the agency shrouded in mystery for decades The National Security Agency was born out of the legendary codebreaking programs of World War II that cracked the famed Enigma machine and other German and Japanese codes thereby turning the tide of Allied victory In the postwar years as the United States developed a new enemy in the Soviet Union our intelligence community found itself targeting not soldiers on the battlefield but suspected spies foreign leaders and even American citizens Throughout the second half of the twentieth century NSA played a vital often fraught and controversial role in the major events of the Cold War from the Korean War to the Cuban Missile Crisis to Vietnam and beyond In *Code Warriors* Stephen Budiansky a longtime expert in cryptology tells the fascinating story of how NSA came to be from its roots in World War II through the fall of the Berlin Wall Along the way he guides us through the fascinating challenges faced by cryptanalysts and how they broke some of the most complicated codes of the twentieth century With access to new documents Budiansky shows where the agency succeeded and failed during the Cold War but his account also offers crucial perspective for assessing NSA today in the wake of the Edward Snowden revelations Budiansky shows how NSA's obsession with recording every bit of data and decoding every signal is far from a new development throughout its history the depth and breadth of the agency's reach has resulted in both remarkable successes and destructive failures Featuring a series of appendixes that explain the technical details of Soviet codes and how they were broken this is a rich and riveting history of the underbelly of the Cold War and an essential and timely read for all who seek to understand the origins of the modern NSA

Phosphorus Pollution Control Aleksandra Drizo, 2019-10-16 Phosphorus Pollution Control Policies and Strategies Deterioration and decline of water resources due to pollution caused by humans and their activities has become a universal health environmental social and economic problem Excess discharges of nutrients in particular phosphorus has been recognized as the most prevalent water pollution problem globally Moreover its perpetual occurrence

and expansion creates imminent threats to water and food security Despite extensive research during the past five decades many key questions in eutrophication science remain unanswered This book summarizes the most recent policies and strategies for phosphorus removal and recovery from municipal residential and agricultural wastewater effluents and runoff into a concise and up to date volume The book will be of interest to environmental and water resources scientists and engineers consultants policy makers and practitioners working in the field *Airships* Iver P. Cooper,2025-05-15 Many people may know about the blazing crash of the Hindenburg in 1937 but are possibly unaware that it had made 62 flights before its final journey including one transporting author Leslie Charteris creator of The Saint The disaster however did not end the airship era blimps escorted convoys during World War II and were a part of air defense systems in the 1950s and 1960s Airships still fly today and new models are in the construction phase This book examines this branch of aviation history delving into the science and engineering of airships and their design flaws weather difficulties and operational errors The chapters focus on function lift propulsion materials ground handling and so forth The book concludes with speculations about future airship designs and missions **Access to Justice and International Organizations** Pierre Schmitt,2017-08-25 Recent examples such as the cholera outbreak in Haiti demonstrate that individual victims of human rights violations by international organizations are frequently left in the cold Following an examination of the human rights obligations of international organizations this book scrutinizes their dispute settlement mechanisms as well as the conflict between their immunities and the right of access to justice before national jurisdictions It concludes with normative proposals addressed both to international organizations and to national judges confronted with such cases *Financial Institutions in Distress* Ronald Davis,Stephan Madaus,Monica Marcucci,Irit Mevorach,Riz Mokal,Barbara Romaine,Janis Sarra,Ignacio Tirado,2023-08-10 Political boundaries are often porous to finance financial intermediation and financial distress Yet they are highly impervious to financial regulation When inhabitants of a country suffering a deficit of purchasing power are able to access and deploy funds flowing in from a country with a surfeit of such power the inhabitants of both countries may benefit They may also benefit when institutions undertaking such cross border financial intermediation experience economies of scale and are able to innovate and to offer funds and services at lower costs Inevitably however at least some such institutions will sometimes act imprudently some of the projects in which such funds are deployed may be unwise and other such projects can suffer from unforeseen circumstances As a result of such factors a financial institution may suffer distress in one country and may then transmit such distress to other countries in which it operates The efficacy of any response to such cross border transmission of distress may turn on the response being given due effect in both or all the territories in which the distressed financial institution operates This situation creates a conundrum for policymakers legislators and regulators who wish to enable those subject to their jurisdiction to access the benefits of cross border financial intermediation yet cannot make rules and regulations that would have effect outside that jurisdiction This book explores this

conundrum and offers a response It does so by drawing on and adding to the literatures on financial intermediation regulation and distress and on existing hard and soft laws and regulations The book advocates for the creation of a model law that would address the full range of financial institutions including insurance companies and that would enable relevant authorities to cooperate with counterparts in advance of the onset of distress and to give appropriate effect in their jurisdiction to measures taken by counterpart authorities in other jurisdictions in which the distressed institution also operates

The Accountability Gap in EU law Marios Costa,2016-10-04 Almost two decades ago the fall of the Santer Commission against a background of allegations of maladministration and nepotism had the effect of placing accountability on the political agenda of the EU institutions More recently the non ratification of the Constitutional Treaty the difficulties of the ratification of the Lisbon Treaty and the current financial crisis have increased the calls for accountability in the EU This book investigates whether any progress towards more accountability and transparency has been made in the post Lisbon era by taking a holistic approach to the subject Marios Costa argues that currently the EU institutions and the Member States are not in a position to hold the so called independent agencies as well as the various committees and expert groups accountable Despite recent progress the EU still needs to put forward an acceptable constitutional framework which will truly secure accountability at the EU level of governance
