

Module 56: Theories and Physiology of Emotion

What makes it easy for our feelings to hijack our thinking?

The **amygdala** sends more neural projections up to the cortex than it receives back.

Lazarus conceded that some emotional responses do not require **conscious** thinking.

Table 96.1 Summary of Emotion Theories

Theory	Explanation of Emotions	Example
James-Lange	Emotions arise from our awareness of our bodily responses to emotion-arousing stimuli: stimulus- arousal- emotion	We observe our heart racing after a threat and then we feel afraid
Cannon-Bard	Emotion-arousing stimuli trigger our bodily responses and simultaneous subjective experience	Our heart races at the same time that we feel afraid
Schachter-Singer	Our experience of emotion depends on two factors: general arousal and a conscious cognitive label	We may interpret our arousal as fear or excitement, depending on the context
Zajonc; LeDoux	Some embodied responses happen instantly, without conscious appraisal	We automatically feel startled by a sound in the forest before labeling it as a threat
Lazarus	Cognitive appraisal (is it dangerous or not?)- sometimes without our awareness- defines emotion	The sound is "just the wind"

What is activated when we experience negative social emotions such as lust, pride, and disgust?

Insula

Positive moods tend to trigger more activity where?

Frontal lobe

Myers, Richard O. Straub, 2008-11-28 **SCM Studyguide: Theological Reflection** Judith Thompson, Stephen

Pattison,2018-02-28 Since it was first published the SCM Studyguide to Theological Reflection has quickly gained a reputation for being a vital and accessible guide to the subject for all who embark on it for the first time This studyguide offers newcomers a step by step introduction to understanding what theological reflection is and helps them to explore which of the methods introduced best suits them and their particular situation It is practical in emphasis providing students with a wide variety of worked examples and opportunities to carry out their own exercises This 2nd edition will bring the content up to date offering a revised and improved bibliography and updated and refreshed examples and exercises including new sections on scriptural reasoning and contemplative theology Discovering Psychology Telecourse Study Guide David S. Moore,1991 *Emotional Memory Failures* Ineke Wessel,Daniel B. Wright,2004 The beginning of the 1990 s saw a partisan debate about the nature of recovered memories for highly emotional events Some authors claimed that recovered memories of trauma always referred to veridical memories that had been inaccessible for years Others argued that such memories were false by definition and that they were created by therapeutic attempts to uncover trauma that was believed to lie at the root of anxiety or depression Although the debate soon moved to a middle ground both sides fuelled the development of relevant experimental paradigms to explore the mechanisms for how false memories might be created and also how true memories might be forgotten Examples are studies looking at memory implanting false word memory and retrieval induced forgetting in the mid 1990 s Many studies using such paradigms however relied on emotionally neutral material Studies relating to trauma were less readily available Now more and more researchers are bridging this gap testing whether emotive material can be implanted and forgotten and whether there are special populations more susceptible to these effects This special issue brings together papers examining emotion and memory malleability both providing a picture of the state of the art research and pushing the field forward *Genes, brain, and emotions* Andrei C. Miu,Judith R. Homberg,Klaus-Peter Lesch,2019-04-04 The study of emotions has rapidly expanded in recent decades incorporating interdisciplinary research on the genetic underpinnings and neural mechanisms of emotion This has involved a wide range of methods from as varied fields as behavioral genetics molecular biology and cognitive neuroscience and has allowed researchers to start addressing complex multi level questions such as what is the role of genes in individual differences in emotions and emotional vulnerability to psychopathology and what are the neural mechanisms through which genes and experience shape these emotion Genes Brain and Emotions Interdisciplinary and translational perspectives offers a comprehensive account of this interdisciplinary field of research bridging psychology genetics and neuroscience with rich sections dedicated to methods cognitive and biological mechanisms and psychopathology Written by leading researchers who have each inspired new research directions and innovated methods and concepts this book will be of interest to anyone working or studying in the field of affective science whether they be behavioural geneticists psychologists and psychiatrists or cognitive neuroscientists

Emotions and Organizational Dynamism Wilfred J. Zerbe,Charmine E. J. Härtel,Neal M. Ashkanasy,2010-07-02

Emotions have widespread effects in organizations and underlie a broad range of dynamics in organizations This volume explores the role that emotion plays in such diverse organizational phenomena as entrepreneurship change service failure and creativity Handbook of the Sociology of Emotions Jan Stets,Jonathan H. Turner,2007-02-25 For almost thirty years sociologists have increasingly theorized about and conducted research on human emotions Surprisingly it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry What makes this late date surprising is that it is now obvious that human behavior interaction and organization are driven by emotions It was an immense oversight for emotions to be de emphasized in sociological theorizing and research for most of its 175 year history Since the 1970s however the study of emotions has accelerated and is now at the forefront of sociological analysis This book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions Key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of emotions The outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs The first section of the book addresses the range of emotions and how they can be classified the neurological underpinnings of emotions and the effect of gender on emotions The second section reviews the prominent sociological theories of emotions including theories emphasizing power and status rituals identity and self psychoanalytic dynamics exchange expectation states and evolution While there is little integration among these theories this state of affairs will not last forever The third section addresses theory and research on specific emotions such as love jealousy and envy empathy sympathy anger grief and the moral emotions While this list does not exhaust the range of human feeling they are central emotions that drive human behavior interaction and social organization The last section explores howthe study of emotions has added new insight into other subfields within sociology such as the study of the workplace health and social movements These chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology Although no book can completely cover a field even a relatively new one like the sociology of emotions this Handbook of the Sociology of Emotions comes close to being comprehensive The reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years **Book of abstracts. Meaning and Knowledge Representation 11th International Conference** María Enriqueta Cortés de los Ríos,María del Mar Sánchez Pérez,2024-10-18 Natural language understanding systems require a knowledge base provided with formal representations reflecting the structure of human beings cognitive system Although surface semantics can be sufficient in some other systems the construction of a robust knowledge base guarantees its use in most natural language processing applications thus consolidating the concept of resource reuse This conference deals with meaning and knowledge representation in the context of natural language understanding from the perspective of theoretical linguistics computational

linguistics cognitive science knowledge engineering artificial intelligence natural language processing text analytics or linked data and semantic web technologies
