Student Learning Goal:

Physical Science: 3 Develop an understanding of the periodic table; (b) Analyze patterns and trends in the organization of elements in the periodic table and compare their relationship to position in the periodic table.

- Atomic number, atomic mass, mass number, and number of protons, electrons, and neutrons in isotopes of elements
- Periodic properties

B: Structure and Properties of Matter

- An element is composed of a single type of atom. When elements are listed in order according to the number of protons (called the atomic number), repeating patterns of physical and chemical properties identify families of elements with similar properties. This "Periodic Table" is a consequence of the repeating pattern of outermost electrons and their permitted energies.

Lesson Performance Task/Assessment:

Formative: We will have an opening discussion on the periodic table and the trends that go along with it.
