Financing The Eu Budget Moving Forward Or Backwards:

Financing the EU Budget Gabriele Cipriani, 2014-11-19 Often described as complex opaque and unfair the EU budget financing system is an unfinished journey One of the most critical issues is that EU revenue drawn from the cashbox of national taxation remains impalpable to the general public The nature of the EU as a union of states and their nationals makes the visibility of EU revenue unavoidable The political sustainability of a move that would put the legitimacy of EU revenue at the forefront of public discussion will depend on the European Commission's ability to show that EU funds can achieve results that are truly beyond member states reach The value added tax VAT is a natural choice for funding the EU budget through a dedicated EU VAT rate as part of the national VAT and designed as such in fiscal receipts whose use as a means for raising EU citizens awareness could be encouraged already in the current arrangements *Financial*

Student Mobility Rights and National Higher Education Autonomy in the European Union Alexander Hoogenboom, 2017-09-18 Traditionally viewed as a positive phenomenon student mobility has recently come under critical scrutiny as a result of the financial crisis pushing European solidarity to its breaking point and the fear of excessive EU incursion into the autonomy of Member States with respect to their higher education systems In *Balancing Student Mobility Rights and National Higher Education Autonomy in the European Union* Alexander Hoogenboom contributes to the ongoing and evolving debate from a legal perspective The book offers recommendations with a view to reconcile the mobility rights of Union citizens for study purposes and the need to respect Member State autonomy in the organisation of their higher education systems The argument made suggests rethinking established principles in EU free movement law while encouraging greater EU involvement in student funding opportunities SOCIAL RIGHTS IN EUROPE IN AN AGE OF

AUSTERITY Stefano Civitarese Matteucci, Simon Halliday, 2017-08-07 This collection of essays examines the promise and limits of social rights in Europe in a time of austerity Presenting in the first instance five national case studies representing the biggest European economies UK France Germany Italy and Spain it offers an account of recent reforms to social welfare and the attempts to resist them through litigation The case studies are then used as a foundation for theory building about social rights This second group of chapters develops theory along two complementary lines first they explore the dynamics between social rights public law poverty and welfare in times of economic crisis second they consider the particular

significance of the European context for articulations of and struggles over social rights Employing a range and depth of expertise across Europe the book constitutes a timely and highly significant contribution to socio legal scholarship about the character and resilience of social rights in our national and regional constitutional settings *Oxford Principles of European Union Law* Robert Schütze,Takis Tridimas,2018-02-23 Since the 1957 Rome Treaty the European Union has changed dramatically in terms of its composition scope and depth Originally established by six Western European States the EU today has 28 Members and covers almost the entire European continent and while initially confined to establishing a common market the EU has come to influence all areas of political economic and social life In parallel with this enormous geographic and thematic expansion the constitutional and legislative principles underpinning the European Union have constantly evolved This three volume study aims to provide an authoritative academic treatment of European Union law Written by leading scholars and practitioners each chapter offers a comprehensive and critical assessment of the state of the law Doctrinal in presentation each volume nonetheless tries to present a broader historical and comparative perspective Volume I provides an analysis of the constitutional principles governing the European Union It covers the history of the EU the constitutional foundations the institutional framework legislative and executive governance judicial protection and external relations Volume II explores the structure of the internal market while Volume III finally analyses the internal and external substantive policies of the EU *Tax Law in Times of Crisis and Recovery* Dominic de Cogan,Alexis Brassey,Peter Harris,2023-05-04 This book examines the relationship between tax law and crisis In times of environmental financial and public health breakdown policymakers look to tax for solutions Yet these crises also constrain the ways in which tax liabilities can be imposed and administered and limit the revenues that can be collected What should governments do in these circumstances and what are the wider consequences for states societies and institutions such as the EU The book shows how crises place strain on the basic functions of tax including revenue raising institution building regulation redistribution and the structuring of society These strains bear more heavily on some sections of business and society than others This makes the tax consequences of crisis unpredictable It also means that the best choice of legal response is not merely a technical matter Instead it engages deeper attitudes towards crisis relief change social values and democratic control These issues are highlighted by COVID 19 but are of utmost lasting importance The book takes a comprehensive approach and looks in more depth at the systemic roles that crises play in contemporary tax systems It features an impressive cast of leading researchers across multiple jurisdictions and is essential for policymakers and scholars alike *Imperative of Economic Growth in the Eurozone: Competitiveness, Capital Flows and Structural Reforms* Lubor Lacina,Antonin Rusek,2018-01-15 European economic recovery appears to be taking hold So is the European crisis over The acute phase of the crisis passed however a number of medium and long term issues remain The policies of internal devaluations are working albeit slowly to restore competitiveness in the countries most affected by the crisis However growth remains at best sluggish The medium and long

term outlook remains highly uncertain fomenting social tensions and endangering political stability The restoration of economic dynamism is increasingly perceived as the answer to the question of the European future economically politically and socially There is a broad consensus that dynamic structural reforms and the restoration of competitiveness at the level of the global economy are key answers to current European challenges However whatever the form these may take the transfer of resources is implicit and seemingly necessary to underpin the current structure of eurozone This indeed raises the question of governance both fiscal and monetary After all the provision of resources implies an allocation and it is hard to imagine that resources will be provided to the common pool unless the providers have some say with respect to allocation And that requires some form of common i e centralized decision making procedures in all likelihood exceeding the common understanding of the *acquis communautaire* as it exists today i e some form of the effective political arrangement In this context the basic idea which connects all contributions in this volume is the analysis of the problems which affected the Eurozone in the past decade and the challenges and dilemmas the Eurozone will face in the coming years

European Regional Development Paweł Churski, Tomasz Herodowicz, Barbara Konecka-Szydłowska, Robert Perdał, 2021-11-18 This book offers a comprehensive overview of contemporary issues of regional development It places particular emphasis on its socio economic and socio political determinants which accompany the problem of existing and ever widening differences in the level of regional development in various parts of Europe In order to diagnose the scale of those differences and to indicate the main forces behind the divergence of development the authors propose an original systematisation of regional development factors drawing attention to the need to consider them within the framework of present day socio economic megatrends The proposed approach to the development factors is also used for the author's operationalisation of the concept of territorial capital which is at the centre of regional place based policy The wide spatial aspect of the analysis national and local and its extensive temporal scope 2004 2019 yields unique results and creates an important element of added value for this book which shows the regularities of the process of regional development in Europe at three spatial levels pan European national and intra regional Furthermore it indicates the challenges faced by regionalists who attempt to carry out research on different territorial levels with a diverse number of units 205 EU regions 16 Polish voivodeships 2 478 Polish local units and extended observation periods 2004 2017 The solutions proposed by the authors who show the potential of overcoming the barriers resulting from limited access to complete and comparable statistical data series should be inspiring for many researchers The unique results of direct research carried out on a large sample of respondents and entrepreneurs via diverse field research techniques constitute a valuable source of information on local conditions that impact contemporary development processes in less developed regions Their value is even greater because they were carried out in a unique laboratory created by the authors for testing the regularity of formation and impact of socio economic development factors in various locally determined conditions of this process It consists of purposefully selected test units LAU2 Located in a less

developed region they represent all growth types and functional test units identified in the course of the research. Consequently the results obtained may be generalised and applied to other areas showing similar features of territorial capital. The monograph is addressed primarily to a wide group of regionalists connected with economic and social sciences as well as to practitioners involved in the implementation of development policies at various levels.

Funding the European Union Great Britain: Parliament: House of Lords: European Union Committee, 2007-03-14. This report finds that the funding of the EU is complex and lacks transparency and that there is a need for a simpler system that would reduce the administrative burden. It concludes that a Gross National Income based revenue source is the best way of providing the bulk of the budget's funding. Apart from other considerations the Committee has seen no evidence that any other new form of taxation would provide the same level of clarity and certainty.

Public Financial Management in the European Union Marta Postuła, 2022-04-19. This book reveals how to create efficient institutions and coordinate policy on a transnational scale to ensure that European Union integration can best meet social needs. It offers a combined technocratic and humanist perspective on the discussion of public financial management. The state as part of its public policy should seek to preserve our social and environmental values yet there are mounting imbalances in society which point to the growing role of the state in minimising them. Under such circumstances it is worth reflecting on how new challenges could require updated more complex formulas to deal with crises in current times and for social and economic policy making by states and the European Union generally which would ensure their compatibility with the world financial markets. The work offers an in depth and unique performance analysis of European Union institutions compared to the national entities of EU Member States. It contributes to the ongoing debate on global public goods and the processes involved in managing their provision. Further it discusses public finance management instruments indicating their historical evolution in practice and their effectiveness measured with the Human Development Index. The author presents a proposal of how to manage global European and national public goods across three areas: environmental protection, transnational infrastructure projects and social policy. The book analyses public financial management instruments used during the recent pandemic making a distinction between regular and emergency instruments and assessing their effectiveness in specific economic situations. This will be of interest to researchers and students of economics and finance as well as decision makers and practitioners from governments, international organisations and specific non governmental organisations concerned with issues of public finance management.

DFID financial management Great Britain: Parliament: House of Commons: Committee of Public Accounts,2011-10-20 This report examines the Department for International Development s financial management capability its increasing focus on value for money and the challenges it faces in managing its increasing programme budget while reducing its overall running costs DFID is protected from overall expenditure reductions as the Government has committed to increasing the UK s aid spending to 0.7% of gross national income by 2013 The Department faces a substantial challenge to improve its financial management while reducing its administration costs by a third over the next four years The Committee welcomes the planned introduction in 2011 of a finance improvement plan DFID must now keep up the focus on better financial management There is concern that the Department does not quantify the likely level of leakage through fraud and corruption And DFID is only considering fraud risk at the level of delivery method rather than at a country level Management of fraud risk will require a stronger framework for ensuring money is properly spent on the ground with effective monitoring and pro active anti fraud work The likely increase in funding via multilateral organisations which then determine how to distribute the aid worldwide might not ensure value for money as DFID does not have the same visibility over the cost and performance of multilaterals programmes as it does over its own bilateral programmes Finally the Committee is concerned that the Department still has insufficient data to make informed investment decisions based on value for money
