Handbook of Behavior, Food and Nutrition Victor R. Preedy, Ronald Ross Watson, Colin R. Martin, 2011-04-15 This book disseminates current information pertaining to the modulatory effects of foods and other food substances on behavior and neurological pathways and importantly vice versa This ranges from the neuroendocrine control of eating to the effects of life threatening disease on eating behavior The importance of this contribution to the scientific literature lies in the fact that food and eating are an essential component of cultural heritage but the effects of perturbations in the food cognitive axis can be profound The complex interrelationship between neuropsychological processing diet and behavioral outcome is explored within the context of the most contemporary psychobiological research in the area This comprehensive psychobiology and pathology themed text examines the broad spectrum of diet behavioral and neuropsychological interactions from normative function to occurrences of severe and enduring psychopathological processes Ford Ka
