Geriatric Oral Health:

Geriatric Dentistry Athena S. Papas, Linda C. Niessen, Howard H. Chauncey, 1991 **Oral Health and Aging** Christie-Michele Hogue, Jorge G. Ruiz, 2022-02-01 This book provides a comprehensive review of the assessment and management of older people's oral health care needs. Discussing recent initiatives to emphasize oral health promotion and prevention, the book describes improvements in pharmacological and non-pharmacological approaches for special populations in geriatrics and illuminates the role of barriers to oral health care for older people. Divided into three sections, the book first explores aging and oral health, including age-related changes, epidemiology, nutrition, dysphagia, aspiration pneumonia, xerostomia, and hyposalivation; management of periodontal disease and caries; systemic diseases that influence oral health; and considerations for chronic orofacial pain. The second section illuminates the ways in which frailty and other geriatric syndromes influence oral health care in older adults, with a special focus on frailty, dementia, delirium, and depression, and the delivery of oral health care to vulnerable geriatric populations in long-term care, home care, palliative care, and hospice. Lastly, the book addresses inequalities in the oral health of older minority populations, the disproportionate burden of oral disease and tooth loss, the contribution of these issues to further complications in comorbidities, the association of extended health literacy and periodontal disease, and the social and cultural conditions that might be altered or improved by healthcare programs and health policies. *Oral Health and Aging* is a useful book written by an international group of experts and designed to educate geriatricians, primary care physicians, nurses, dentists, dental hygienists, speech and language pathologists, dietitians, and health policy advocates. **Geriatric Dental Medicine, An Issue of Dental Clinics of North America** Joseph M.
